

ELECTRICITY— EVERYWHERE

The practical farmer everywhere uses Delco-Light. This complete power plant makes winter days longer. It provides a plentiful, reliable supply of bright, safe electric light for long winter evenings and gloomy, stormy days. A touch of the switch, and you have clear, cheery light in any part of the house. Delco-Light is a never-failing source of steady, powerful energy, instantly snapped into action.

If You Must Work at Night Use the Power of Delco-Light

Artificial light is a necessity for winter work. For chores, for work in the barn, the dairy, the poultry house, the uses of Delco-Light are manifold. Authorities agree that the electric light, properly used, will greatly increase the laying capacity of your flock. Early morning milking is made easier when Delco Light power operates the speedy milking machines, and lights the barn and dairy. It provides convenient, economical power for separating and churning. The disagreeable task of pumping water by hand in winter is done away with when you have a Delco-Light water pumping apparatus.

For the Woman on the Farm

Delco-Light power brings relief from drudgery to the farm home. It makes short work of cleaning and washing. Running water—hot and cold—for winter laundering, and electric irons for ironing day, these modern conveniences can easily be made part of your home with Delco-Light.

Cast Off the Shackles of Winter Labor With Delco-Light, the Farm Work Saver

The complete story of Delco-Light is interestingly told in our free book. It explains the many uses of the cheap power made by Delco-Light. To ask for YOUR copy of this book is the first step towards freeing your farm from tedious tasks. Write for your copy today—use the coupon in the corner.
