

REPORT EXPECTED TO FAVOR BENHAM FALLS RESERVOIR

Salem, May 6.—A favorable report on the feasibility of the Benham Falls reservoir site in Deschutes county by W. O. Crosby, geological engineer, who was employed to make a survey of the state, is forecast in a telegram received by State Engineer Copper this morning from the United States reclamation service at Washington, which states that the report will be completed by May 15.

This means that construction work on the immense Benham Falls reservoir, the largest project of its kind ever attempted in Oregon, will be started this summer, according to members of the state engineering department here. The proposed reservoir covers some 23,000 acres and will involve the construction of a dam 60 feet high. The reservoir will have a capacity of 530,000 acre-feet, sufficient water, it is said, to irrigate the 200,000 acres included in the big deschutes project. The construction of the reservoir will involve the expenditure of approximately \$1,321,000.

Application for an increase in telephone rates was filed with the public service commission Wednesday by the Fossil Telephone company of Fossil, Wheeler county.

Until congress passes some legislation relative to the distribution of captured enemy material Oregon cannot hope to receive the four captured German field guns requested by Governor Olcott for use in the state.
