KING COTTON'S THRONE SHAKY, REPORTS SHOW

Crop Condition Is "Worst Ever Known," Says Federal Report, 62.4 Per Cent of Normal.

By Associated Press.
Washington, June 2.—Reporting the condition of the cotton crop May 25 at 62.4 per cent of normal, the department of agriculture announced that this was the lowest in its record of 50 years, and that the recurring statement, "Worst ever known," was confirmed. No forecast of production was made. Revised figures of the area planted last year were announced as 35,125,000 acres, the area picked 23,566,000 acres, and the yield per acre 161.5 pounds. The May 25 condition last year was 78.6 per cent of a normal, and the ten year average 78.7.

King Cotton Is Making a Game Fight-Here

Read the Associated Press News report reprinted here from Wednesday evening's paper. It tells of a grave shortage in the cotton crop—"the lowest in the last fifty years." This can mean but one thing—cotton prices will be higher; yes, much higher.

So in view of these FACTS the prices on cotton goods which we publish on this page are indeed astounding—King Cotton is making the gamest fight of his entire life at this store and our patrons will realize the advisability of taking full advantage of the offerings for Monday.

Lipman Wolfe & Co.
