A conference of representatives from agencies in Oregon interested in public health nursing is called for Tuesday at 4:30 p. m. in 1010 Selling building, to form a committee on public health nursing as a part of the state board of health.

Following are the suggested functions of such a committee, made by Miss Jane C. To promote the use among public health nurses of all available resources for help. TO EDUCATE THE PUBLIC To aid in informing the public as to the nature, scope and proper standards of public health nursing.

To initiate or support necessary state legislation for the promotion of public health nursing. The suggested specific activities are: Effort to bring together and coordinate all public health nursing agencies of the state so that working neglected may be covered, overlapping may be prevented and the activities of all may be developed with the least waste and the greatest effect.

Endeavor to persuade trustees of hospitals to improve and enlarge educational facilities in nurses' training schools; should encourage the support and endowment of such schools and of courses in public health nursing and work for the advancement of a better standard of nursing education. It should also make known to them and encourage them to make use of all national and state resources available for their help in order that they may cease to be isolated units working in solitude and may profit by the experience, experiments and support of all the other workers in their field.
