Now Is the Time To Purchase Municipal Bonds

Always an excellent investment, and one esteemed by conservative investors, because tax-secured and also free from federal income tax, Municipal Bonds are today exceptionally good.

Now the purchasing power of the dollar is at the lowest point; at maturity these bonds will be paid in dollars of normal purchasing power.

Present interest rates are unusually high; if this opportunity is neglected, these rates will probably be unobtainable in a few years.

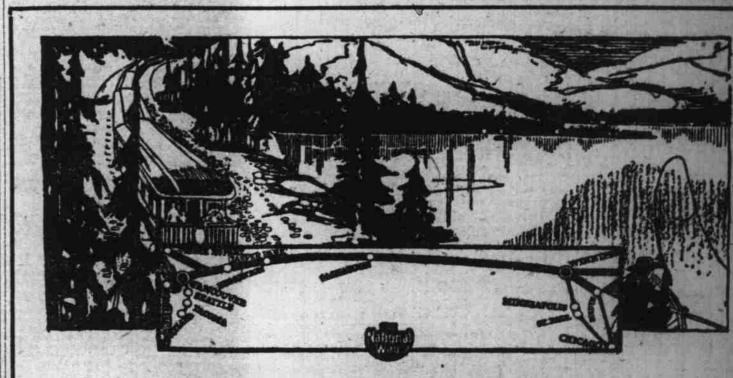

Investment now will give the purchases an exceptionally high yield extending over a period of years.

We own and offer several blocks of Municipal Bonds that have been thoroughly investigated. They may be purchased unhesitatingly by those desiring to put some idle dollars to profitable use.
