

TWINS FOUND IN WELL LIVE; PAIR HELD BY POLICE

Omaha, July 23.—(U. P.)—Mystery still surrounds the finding of day old twin babies in an abandoned well here Saturday night.

"Doctor" H. S. Kent, held by police in connection with the finding of the "eleven twins," and their alleged father, remains silent after having declared he can defend any attempt to prosecute him.

Miss Louise Boeke, supposed mother of the twins, and her mother, continue in their assertions that the girl is not the mother of the twins, while neighbors are insistent that the babies were born to Miss Boeke Friday and that she was attended by Kent.

Friday, about noon, he gave her some medicine, she said, after which she went to sleep. Neighbors testify to having seen "Doctor" Kent leave the home Friday carrying a pail and a basket, corresponding to the containers in which the babies were found.

The twins were found by children late Saturday in an abandoned well near the Boeke home. Kent has been a boarder at the Boeke home and had a part interest in a small store run by Mrs. Boeke.

An apparent difference of a day in the age of the babies has raised some doubt as to whether they are twins, while it is also said their condition indicates they were given medical attention at birth and were born of a mother who had previously given birth to children.

Meanwhile, the babies, named Jimmy and Betty "Wells" by nurses, thrive while their parentage is in dispute.

Greeley to Inquire Into Pulp Industry Prospects in Alaska

Possibilities for development of a mammoth wood pulp industry in the Tongass national forest of Alaska will be investigated this summer by Colonel W. B. Greeley, chief forester of the United States. Greeley arrived from the East Monday night and left Tuesday night for Tacoma, where he is scheduled to address a meeting of loggers and lumber manufacturers called by officers of the West Coast Lumbermen's association.

Colonel Greeley, accompanied by George Cecil, district forester of the Portland office, will sail for Alaska from Seattle Thursday morning to gather first hand information as to the feasibility of establishing pulp mills in the Tongass reserve.

Never a corn on millions of feet nowadays
Do you know that millions of people who use Blue-jay keep entirely free from corns?
If a corn appears it is ended by a touch. A Blue-jay plaster or a drop of liquid Blue-jay is applied.
The corn pain stops. Soon the whole corn loosens and comes out.
The method is scientific. It's gentle, easy, sure. Old-time harsh treatments are supplanted by it with everyone who knows it.
It is made by a world-famed laboratory, which every physician respects.
It is now applied to some 20 million corns a year. You can see that corn troubles are fast disappearing.
Then why pare corns and keep them? Why use methods which are out-of-date? Try this new-day method. See what it does to one corn. You will never forget its quick and gentle action. Your druggist sells Blue-jay.
