

JIMMY, REPORTER, SWAYS GOV. COX, SAYS LAWRENCE

Jimmy Cox, Active Newspaperman,
Always Uppermost in Nominee,
Declares Noted Correspondent.

By David Lawrence
Dayton, Ohio, July 21.—Governor Cox, Democratic candidate for the presidency, and "Jimmy" Cox, newspaper reporter and editor, are merged into one personality, but as the writer visited the Democratic nominee and watched him work on the speech of acceptance, there seemed no doubt that Jimmy Cox, active newspaper man, was predominant.

Seated in his study on the upper floor of his country home, where he could rest his eyes on a landscape of transcendent beauty, the governor had spread around him hatches of copy paper, clippings, documents and records in exactly the same disorder that one finds on any newspaper desk before editions go to press.

WOULD LIKE STUMP SPEECH
The governor was writing long hand on the rough newspaper paper which is used every day by reporters. He had been writing rapidly—as if the next edition of his newspaper demanded his copy. As the writer entered, the governor swept aside a mountain of copy paper and talked enthusiastically about his subjects. He wished he didn't have to make a formal speech of acceptance, but could make a stump speech. He wanted to get into the fray without the staid formalities that must accompany a speech of acceptance. He told me he was saving a good deal of material for speeches to be made on the stump later on.

The Democratic nominee gave the appearance of happiness and confidence. He didn't say anything about the result next November, but he said a "good deal about the certainty which he felt in the rightness of the course he had chosen. Much of his speech will be an answer to Senator Harding's speech of acceptance, and much of it will be the exposition of constructive policies which Governor Cox pledges himself to carry out in the event that he is elected. Of course, Mr. Cox has pledged everybody here in the newspaper to secrecy about the topics which will be discussed in the speech, and there's one passage in particular which he is guarding with the utmost care.

LAWRENCE SEEKS JIMMY
One reason why the writer couldn't help thinking it was Jimmy the newspaper man, rather than the candidate who was working on that speech, was the governor's references to the mysterious paragraph which he plans to insert in his speech at the last moment by giving it to the correspondents next Saturday to send by wire. Ordinarily a speech of this kind is prepared a week in advance so that it can be mailed to all the newspapers from coast to coast and thus get the widest publicity. To hold it till the last minute and then put it on the telegraph wires would burden those wires and keep other news of the day from being distributed in its usual proportion. So with a speech like this—eight columns long—the author must finish it a week ahead of time to reach all editions on the Pacific coast. A small insertion can readily be sent by wire and one reason why Governor Cox does not want to put the particular

paragraph in the speech ahead of time is his certainty that it will be promptly carried back to Republican headquarters. Sending a speech to hundreds of newspapers means having it pass through countless hands.

WANTS TO BE FIRST
There is not much secrecy about speeches given out in advance, so far as conversation about them is concerned, though, to be sure, they are never published in newspapers before the date of delivery unless by accident or misunderstanding. Governor Cox has proposed something which he wants to be the first to lay before the country. Maybe Senator Harding will think well of it and imitate the Democratic nominee. Maybe he will not. Anyway, the Democratic nominee doesn't want to get "scooped" by the Republican nominee and he is holding his announcement till the last minute.

Jimmy Cox, the newspaperman, is responsible for that caution and strategy and when the public reads that particular announcement of non-partisan policy which he proposes, perhaps the reason for his action will be better understood.

COX TURNS IN COPY FOR SPEECH AND PLAYS GOLF
Dayton, Ohio, July 21.—With his speech of acceptance finished and in the hands of printers, Governor James M. Cox, Democratic presidential nominee, this afternoon relaxed from the strain of a strenuous week and played 18 holes of golf in a drizzling rain at the Dayton Country club.

The governor made it plain that he will not reply at this time to the charges of Senator Harding, Republican nominee, that "certain powerful international interests which are deeply concerned in carrying out the present administration's foreign policy are prepared to contribute most liberally to the Democratic funds."

As on a previous occasion, the governor intimated that he would not be drawn into a discussion with Senator Harding, at least until after his formal acceptance of the nomination.

American Airplanes Delayed in Canada

Winnipeg, Man., July 11.—(U. P.)—The four American airplanes making a flight from Minnea, Minn., to Nome, Alaska, arrived at 11:30 a. m. in the morning at four o'clock this afternoon. They had difficulty in landing. They will be delayed for three days making repairs to their planes and getting everything in shape for the remainder of the mountain journey, the most hazardous portion of the whole trip.

More Troops Being Sent Into Ireland

London, July 21.—More British troops were sent into Ireland today, as new reports of fighting between Sinn Feiners and British government forces were received here. Meanwhile Premier Lloyd George was planning to push through parliament with all possible speed the proposal authorizing more drastic measures to suppress the guerrilla warfare in Ireland.

New Bill to Replace Irish Courtsmartial

London, Aug. 1.—The new British government bill designed to cope with the Irish situation provides for the replacement of civil trials by courts martial at Dublin, according to an announcement in the Sunday Pictorial today. Special cases may be tried in London. It has been announced that the bill will be introduced Thursday.

Pipeless Furnace Demonstration!

Mr. E. P. Lane, Expert Heating Engineer, direct from the "Homer Pipeless Furnace Factory," will be at this store all week. Consult him on your problems of home heating.

—It would be quite impossible to measure in dollars and cents the value of the information Mr. Lane will cheerfully give you on your individual problem of economical home heating. The present high cost of fuel with the prospect of even higher prices demands the most economical method of heating. It was with this thought that Edwards arranged for the factory's Heating Engineer to come here in person.

—Mr. Lane will give you vital facts about various kinds of fuel and heating plants. A talk with him will undoubtedly mean the saving of many dollars in your fuel bill regardless of the method of heating you use. Edwards wants you to feel perfectly free to ask questions and make use of this expert heating device. Mr. Lane will be at the store daily from 9:30 to 4:30. Remember—that's this week only!

Just Three of Many Indorsements From "Homer Pipeless Furnace" Owners

Portland, December 20, 1919.
Edwards Company, City.
Gentlemen:
Since installing your Homer Pipeless Furnace (which replaced an American Ideal Radiator System), we have realized about 25 per cent saving in fuel over the steam system. In fact, we have sold a portion of our fuel supply for this reason. We also find that an even temperature is maintained throughout the office and considerably less work is required to fire the furnace. The cold spell just passed gave us a splendid opportunity to test out the merits of your furnace, and we do not hesitate to recommend the same fully. Yours truly,
BAGGAGE & OMNIBUS TRANSFER CO.
(Signed) E. O. Pond, Secretary-Treasurer.

Portland, Oregon, November 5, 1919.
Edwards Company, City.
Gentlemen:
We have had the Homer Pipeless Furnace in our home 60 days and it has proven entirely satisfactory. Two shovelfuls of coal in the morning keep the whole house, including the inclosed sleeping porch at the rear, warm and comfortable all day, even on the coldest days we have had so far, and it saves us about one-half on fuel. We have reason to congratulate ourselves on installing a Homer. Yours truly,
(Signed) RUTH SANDERSON,
1453 Wisteria Ave.

Portland, Oregon, October 27, 1919.
Edwards Company, City.
Gentlemen:
The Homer Pipeless Furnace that you have installed in our home is very satisfactory, both as a heater and fuel saver, and we could recommend the Homer Furnace to any one who is contemplating getting a pipeless furnace. Respectfully yours,
(Signed) MR. AND MRS. FRANK GILLESPIE,
597 E. 66th St. N.

- Perfect in Construction
- Perfect in Accomplishment
- No Heat in the Basement
- No Smoke, Soot or Ashes Upstairs
- There's nothing complicated, nothing mysterious, about "Homer" Pipeless Ventilator Furnaces.
- Installed in any home where there is a basement—no tearing up, no dust or dirt, no inconvenience, no delay.
- Saves fuel, saves labor, saves expense.
- Heats quickly, heats evenly, heats purely.

Here's the Whole Heating Problem in a Nutshell

—This Homer Pipeless Furnace has been approved by Edwards and must give satisfaction under any and all conditions. —Edwards carries the responsibility, and don't you ever think for one minute that his reputation of over 40 years' standing in Portland would be allowed to tumble for the mere selling of a few furnaces. Edwards has taken every element of chance out of the Pipeless Method of Heating Your Home. He positively guarantees this "Homer" to be scientifically practical, economical and healthful.

One Register, the "Homer" Thermo-Seal Inner Lining and the Two-Tunnel Radiator Does All

—Note the Thermo-Seal Inner Lining—Heavy Galvanized Iron with asbestos insulator. Without it there would be no circulation of warm air. It keeps the return air cool until it reaches the base of the furnace. It sends all the heat to the rooms above. The Thermo-Seal is a distinct Homer feature. —Outer and inner casings of the Homer are adjustable to any depth basement of six feet or more. They make airtight connections between the furnace and the register. Made of heavy galvanized iron. —Note the large air spaces which insure the proper ratio of warm and return air passing through the Homer. They are designed to allow all the air to pass through the furnace about every 25 minutes, giving a steady flow of warm air.

If you are unable to come on the streetcar—Edwards will send an automobile to get you, or Mr. Lane will come to your home by appointment. All Homer Furnaces ordered this week will be installed as quickly as possible (within a few days or week)—and you

MAKE NO PAYMENT UNTIL SEPTEMBER 1ST

Easy Terms—No Interest—To Fit Your Individual Requirement Thereafter

Two Rooms to Match—Golden Waxed Oak Bedroom, Lustered Old Ivory or White
THE ENTIRE OUTFIT OR ANY SINGLE PIECE YOU MIGHT SELECT, ARRANGED ON EASY TERMS—NO INTEREST

Living Room—\$88.25
—Both Rockers illustrated are of solid oak. Library Table is also identical to illustration and has quarter-sawed plank top that will open to six feet. All are finished in hand-rubbed golden wax to match the living-room set.

Dining Room—\$78.75
—Six very sturdy chairs with saddle-shaped seats, braced with heavy metal brackets against the back posts. Table has 45-inch quarter-sawed plank top that will open to six feet. All are finished in hand-rubbed golden wax to match the living-room set.

Bedroom—\$112.00
—All five pieces are identical with illustration. Notice the corner posts on the bed—they match perfectly with the others. Then, too, the neatly cut panels—brass enameled side rails are not visible in illustration. Sure, it's full size. The other pieces are full size, too.

A Real Combination—Edwards!

WHY? Because there are two separate and distinct ovens—two separate and distinct cooking tops—but they're built together upon one base, taking up practically the same space as a single range.

NOTE THIS: To bake with gas you MUST have a well-ventilated oven. To bake with wood and coal you MUST have an absolutely tight oven. FURTHER, to have holes MUST be in the top flue at any individual gas range oven. GIBBS BURNS THE OXYGEN OUT OF THE AIR. STEAM AND ODOORS GO UP! IF THERE ARE NO VENTILATION HOLES IN THE TOP—WHAT IS THE RESULT? THINK IT OVER!

INDEED YOU CAN

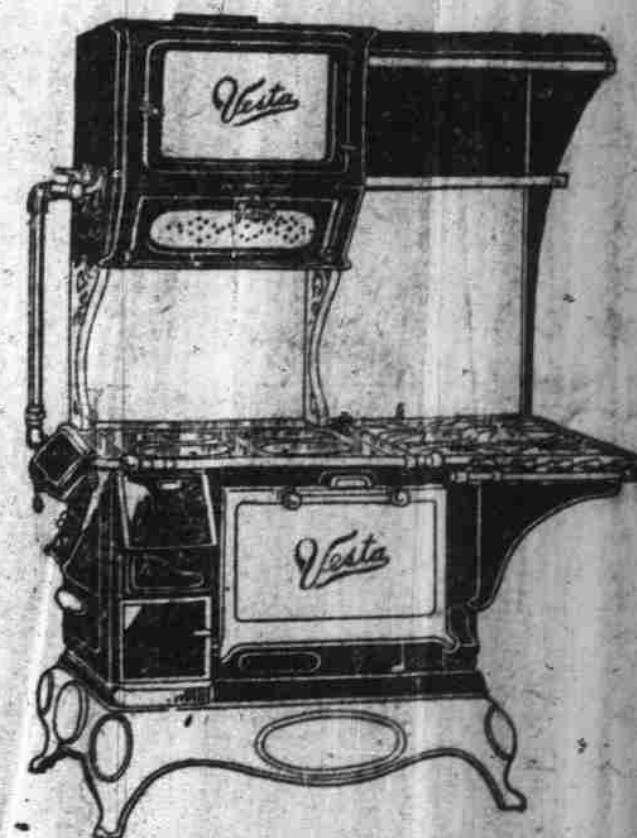

Use Both Ovens and Both Tops at the Same Time, if You Like

- Body is built entirely of cast. Wood and coal oven is also of cast. Gas oven, broiler and canopy over gas burners are of highly polished blue steel.
- Four-lid wood and coal top, four-burner gas top.
- 18x19-inch wood and coal oven, 18x16-inch gas oven.
- Broiler under gas oven. Gas fire lighter in fuel box.
- All polished top, nickel-front leg base.
- Plain nickel trimmings. All cast body.
- White enameled backs. White enameled oven doors.

"Sleepwell"

Quality, Service and Comfort Mattresses

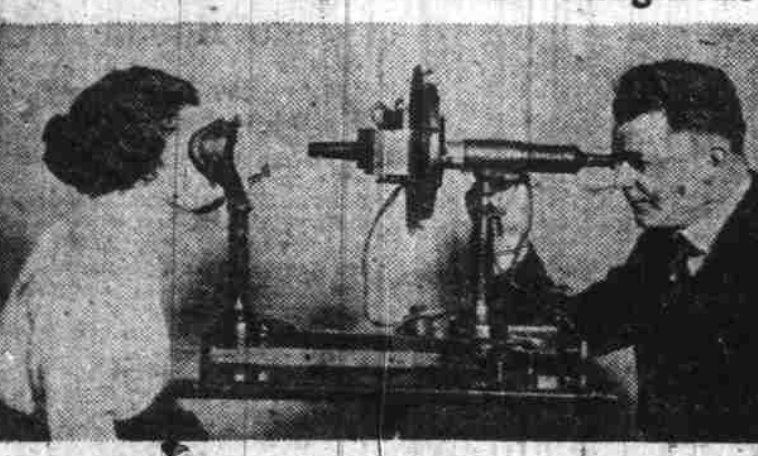

\$25 and \$31

\$5 Cash—\$1 Week—No Interest

—50 pounds of felted cotton built up in layers (like so many comforters) inside of flower-strewn art ticks, with heavy rolled edges and reinforced boxing of long-fiber cotton.

—Sleepwell Mattresses are absolutely guaranteed not to lump or shift. Made in compliance with Oregon's bedding law. Try one for 60 nights; if it's not as stated, return at Edwards' expense.

Scientific Work Plus Mature Judgment

Our Ophthalmometer is one of the most scientific eye-testing instruments in the world. With it we can detect error of vision instantly.

Optometry is called an exact science. It is in the sense that the measurement of the eyes for glasses is done scientifically with the aid of machines that measure accurately the refractive power of the eyes so that lenses may be ground to supply any deficiency.

However, the application of any science depends so largely upon the judgment and skill of the operator that there is a vast difference in the results obtained.

The Thompson Optical Institute offers you everything necessary to the full realization of your hopes for better vision. Our experience, our mature judgment, our equipment all combine to render you satisfactory service in every case.
