ELECTRIC WASHER

Is the wood cylinder for home use. For over 10 years this cylinder has been built of selected white maple for use in the Thor washer.

Experiments with every kind of material that is practical for cylinders has shown that nothing is equal to wood for use in family washers. In metal cylinders the sides are very thin, and as a result the edges of the holes are sharp. As the clothes come in contact with these holes there is continual wear on them. There is absolutely no wear on the clothes in a Thor wood cylinder.

And another very important feature of the wood cylinder is that

it does not have to be lifted out of the machine to be cleaned. 10 Dollars Down-Balance Easy Payments.
