

STATE TENTATIVE BUDGETS ASK FOR LARGE INCREASE

Salem, Nov. 9. — An item of \$155,000 for improvement of the State Fair grounds during the next two years is included in the estimated financial needs of the forthcoming biennium, submitted by the state fair board to the secretary of state's office for reference to the state legislature.

The improvements include a poultry, rabbit and small stock building at an estimated cost of \$25,000; a sheep barn at an estimated cost of \$15,000; a tractor and farm implements building at an estimated cost of \$20,000; an addition to the grandstand at an estimated cost of \$50,000; a state aviation field at an estimated cost of \$10,000. The hard surfacing of roads and walks in the camp grounds at an expenditure of \$25,000 and hard surfacing of additional roads and walks in the main grounds at an expenditure of \$10,000 are included.

\$1,740,000 FOR UNIVERSITY

The total estimated needs for the two year period is fixed at \$255,000, \$90,000 being for general and sheep barns, such as salaries and premiums, and \$10,000 for repairs to buildings already on the grounds.

In submitting its budget of \$61,200 for the biennium of 1921-22 the state banking board recommended a substantial increase of fees for the examination of banks which it declares to be necessary to the maintenance of an efficient department. The addition of a fifth examiner is also recommended.

The financial need of the University of Oregon for the biennium is estimated at \$1,740,000, against an estimate of \$1,023,450, submitted two years ago. The increase being accounted for by additions to the faculty, increases in salaries to faculty members and employees of the institution, repairs and new buildings.

CONTROL BOARD MEETS

The estimates for most of the state departments, commissions and institutions receiving state aid are now in the hands of the secretary of state, most of them showing material increases in their financial needs over estimates of two years ago.

The state board of control met Monday afternoon to consider the estimates submitted by the institutions under their supervision. Consideration of the budget of the state hospital for the insane here occupied the entire afternoon with no final action taken even on this item, and adjournment was taken until Tuesday afternoon.

Superintendent Steiner's budget for the state hospital, estimates the need of \$1,119,216 for the forthcoming biennium. That some very material reductions in these figures are likely was indicated by attitude of the board Monday afternoon in tentatively deciding on a reduction in the estimate on the per capita cost from \$22 per month to \$21 per month, a total reduction in the maintenance item for the two year period of approximately \$43,200.

KNIFE TO BE USED

Superintendent Steiner has also asked for funds for the construction of a cold storage plant at an estimated cost of \$653, an industrial building at a cost of \$40,475, a machinery building at a cost of \$10,206, a fruit storage plant at a cost of \$8100 and a feed barn at the cottage farm to replace the one destroyed by fire during the past summer at a cost of \$12,000.

It is probable that the board of control will also use the pruning knife on one or more of these items, probably to the entire elimination of some of the requested improvements.

In his report Superintendent Steiner shows that products to the value of \$512,899.32 were taken from the hospital farm during the past biennium.

The construction of a new wing at the Eastern Oregon hospital for the insane, to accommodate 200 patients, is recommended by Superintendent Steiner.

CORN BINS IN MIDDLE WEST FAIRLY GROAN

(By Universal Service)
Washington, Nov. 9. — The United States had a bumper crop of corn this year.

There was an unprecedented production of 3,199,128,000 bushels of the golden product recorded this year, according to figures made public Monday by the crop reporting board of the department of agriculture.

This is a tremendous increase of the average in 1914-1918, which was 2,760,434,000 bushels. This great yield is due to more intensive production, an acre yielding 30.9 bushels as compared with the yield of 26.1 bushels per acre which has been the average for the past 10 years.

Who points out that the institution has practically reached the limit of expansion.

Will They Sleep In City's Streets?

Los Angeles, Nov. 9. — (I. N. S.) — The local housing situation had become so critical today, the city council adopted a resolution requesting Secretary of War Baker to loan the city 5000 army tents which are to be put up by the municipality in its various parks to relieve the home shortage.

Tank Battalion Is Sent to Camp Lewis

Washington, D. C., Nov. 9. — Secretary of War has directed the transfer of Company C, 335th Tank Battalion, from Camp Meade, Maryland, to Camp Lewis, Wash., for duty with the Fourth division.

MAN ALLEGED TO HAVE SOLD LITTLE CHILD FOR \$125

Des Moines, Iowa, Nov. 9. — (U. P.) — That John Schmiedekne, Belleville, Ill., sold his own daughter, Virginia, 3 years old, to Mr. and Mrs. Walter S. Lewis of Des Moines for \$125 and traveling expenses from Belleville to Des Moines, was alleged in testimony introduced before District Judge Herbert Utterback today, in the legal battle to determine who shall have possession of the child.

Attorneys representing the local branch of the humane society are attempting to show the Lewises are not fit persons to have possession of the child. They alleged the Lewises gave the child wine to drink and taught her to "shimmy."

Freewater Football Eleven Has Narrow Escape in Smashup

Freewater, Nov. 9. — Friday afternoon, when members of the Union high school football team were journeying to Pendleton to play the Pendleton high, the car, driven by Clarke Van Slyke, in which they were riding, was nearing Adams, going about 20 miles an hour when a car driven by a Weston man came from a side road at about the same rate of speed, and collided with the Van Slyke car, throwing it against the iron rail of the cement bridge. The rail went right through the car door but kept the machine from going down the steep embankment. The boys were picked up by other automobiles and taken to Pendleton.

As Mr. and Mrs. Bert Boylan and family were coming to Freewater from

their ranch home above Milton to spend Sunday with friends a car coming from the opposite direction ran into them. One of the children was huried through the window at the side and her arm was badly hurt.

U. S. Soldier Dead To Remain Abroad

Washington, Nov. 9. — (I. N. S.) — Secretary of War Baker announced today that orders had been given for the concentration of the bodies of the remainder of the American soldier dead in England in a cemetery near London, which will be under the perpetual care and control of the United States government. Five hundred and fifty families have requested that the remains of their soldier dead be permanently interred in England.

CLOTHING REDUCED 10 TO 15 PER CENT

Chicago, Nov. 9. — (I. N. S.) — Indications that clothing prices have not reached the end of their decline were apparent as the United National Clothiers met in convention here today. The association's treasurer and general manager, W. L. Mohr, announced that goods for spring delivery are selling at reductions of from 10 to 15 per cent. Retail clothiers have radically reduced

their "mark up" this season, according to telegraphic replies to questionnaires read to the convention by Irving Crane, secretary of the National Clothiers' association, of New York. Prospects for a profitable season in the clothing industry have been entirely abandoned according to Crane's statement.

"The bottom has been reached in lines where there is no surplus," Crane told the convention, "but in other lines the bottom will continue to be the best figure at which manufacturers and dealers can unload. Most clothing dealers will end the season with a loss rather than a profit due to their efforts to meet the public's view."

Road Districts Changed

Kelso, Wash., Nov. 9. — The boundaries of road districts 1 and 2 were changed by the commissioners of Cowlitz county, the upper Cowlitz country being transferred from 1 to 2.

An Englishman is the inventor of electrical apparatus to notify a ship's officer when a steersman is permitting a vessel to deviate from an established course.

A 10-Day Tube of Pepsodent is sent to anyone who asks. Mail the coupon. Watch the effects. See the changes they bring in a week. It will change your ideas about teeth cleaning.

tion. Highest authorities agree on the need for them. Thus film is combated twice a day in most effective ways. And Nature's acid-fighting forces are given multiplied effect. These new principles are fast being adopted. Modern dentists everywhere are helping. Old methods, which brought opposite effects, are being discontinued. It is time that you made this test. Your tooth brush, probably, has proved inadequate. Teeth have discolored and decayed, perhaps. If you feel the need for new protection, see what this way does.

Teeth will glisten

Teeth glisten when the film is gone. Millions of teeth now show this. You see them wherever you look. Those whiter teeth mean cleaner, safer teeth. The high polish is very desirable, for film cannot easily adhere to such surfaces. Dentists advise that children's teeth be brushed with Pepsodent twice daily from the time the first tooth appears.

Watch the change

Send the coupon for the 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coat disappears. Compare your teeth now with your teeth in ten days. Then judge by what you see and feel. This is most important to you. Cut out the coupon now.

See What Happens When you brush teeth in this way

This offers you a ten-day test of a new teeth-cleaning method. Millions now employ it. Leading dentists everywhere advise it.

You think that your tooth brush cleans. See the difference when you aid it in this way. Learn the reasons for the new results. It may lead to lifelong benefits for all who are in your home.

You must fight film

Your teeth are coated with a film. When fresh it is viscous—you can feel it now. It clings to teeth, gets between the teeth and stays. The tooth brush, used in old ways, does not efficiently combat it. Much of the film remains. And night and day it may do ceaseless damage. Most tooth troubles are now traced to film. Despite the tooth brush, they have been constantly increasing. To ward them off you must combat that film.

How film ruins teeth

Film absorbs stains, making the teeth look dingy. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. These troubles have been alarm-

ingly common. Few people escape them all.

Fight it twice a day

Dental science, after years of research, has found ways to combat film. Able authorities have proved them by careful tests.

The Five Effects

Each use of Pepsodent brings five desired effects:

- 1—A multiplied salivary flow.
- 2—Multiplied starch digestant in the saliva, to digest starch deposits that cling.
- 3—Multiplied alkalinity in the saliva, to neutralize the acids which cause tooth decay.
- 4—Attacks on film in two effective ways.
- 5—High polish, so film cannot easily adhere.

The methods are combined now in a dentifrice called Pepsodent. And millions of people now employ it, largely by dental advice. Other effects are also attained—natural aids to Nature. The five effects we cite here come from every applica-

WITH NOTHING TO "TIDE" HIM OVER

Many a going young business, with brilliant prospects, has been snapped in two and wrecked for want of a small amount of capital. More, in fact, for this reason, than for all others combined.

A tidy sum in savings account, in many cases, would have saved the day!

Remember that the law of compensation is found in business in "trade cycles." The lush, "oversold" days are sure to go—as quickly as they came!

The wise young business man fortifies himself against the inevitable lean period in his business cycle.

Mr. Hoyt, today or any day, will gladly give you complete information regarding savings accounts. He will gladly open one for you.
