

# TERMINAL READY TO BUY LUMBER IN NORTHWEST

Lumbermen of the Northwest have before them a potential solution to the problems of distribution of their products in the Eastern part of the United States which may give great impetus to this industry, announcement having been received that terminal facilities at New York are prepared to handle shipments of timber through that port.

Recently it was proposed by an Eastern company that a giant terminal be built on the Jersey side of Greater New York to handle lumber shipments from the Pacific coast ports which are constantly faced with troublesome rail rates and Eastern distribution problems. The organization formed the Fulton Terminal company.

## COAST MEN ENTHUSIASTIC

Plans of the organization were laid before lumbermen of the Northwest. They were enthusiastic over the scheme which would permit them either to rent dockage or storage space or to have the terminal company act as managing agents.

Thursday afternoon the State Chamber of Commerce received a message from E. R. Shaw and Senator M. G. Thoms of Washington, heads of the Fulton Terminal company, conveying the information that the terminal is "now prepared to contract for Pacific lumber on equitable rates," and wanting to know what support they could expect from lumbermen of this district.

## RATES ASKED FOR

Secretary Quayle and H. L. Held of the Pacific Coast Shippers' association, immediately sent a message to the terminal company, inquiring into storage rates and assembling and reshipping facilities.

"The main problem in the East for the lumber industry is distribution," says Held, "with that solved the lumber industry will be aided materially."

## Watchchain, 6 Feet Long and Valued at \$3500 Among Loot

Seattle, Wash., Nov. 18.—(U. P.)—In a big limousine driven by a negro chauffeur, two "gentlemen bandits" entered the home of Captain J. D. Smith, held him up at the point of a gun and forced him to turn over \$1000 in currency and a six foot watch chain of platinum dipped in gold and valued at \$3500.

The chain is one Smith formerly wore around his neck whenever he appeared in public and is known to all policemen on the local force. Smith did not report the robbery until this afternoon.

One \$500 bill with the initials "J. D. S." written on its face in red ink, four \$100 bills and four \$50 bills were taken by the bandits. No trace of the men has been found.

## Big Fund Is Proposed

Baker, Nov. 18.—Fred A. Phillips, one of the directors of the Powder River Irrigation project, has received a letter

from John Beall, chairman of the finance committee of the Oregon Irrigation congress, asking that steps be taken in this community to assist in raising funds to further irrigation propaganda in congress.

## Officers Elected At Annual Meeting Of Walnut Growers

The second annual convention of the Western Walnut Growers' association, held at the Chamber of Commerce, closed Thursday afternoon with the election of officers: H. A. Henneman, president; A. A. Quarburg of Vancouver, vice president for the state of Washington; Ferd Groner of Hillsboro, vice president for Oregon, and Ben F. Doris, secretary-treasurer.

Addresses were delivered at the morning session by Groner, R. A. Booth of Eugene, W. T. Bixby of McMinnville, and C. I. Lewis.

Before adjourning the convention voted to raise the dues from \$1 to \$2. The third annual convention was scheduled to convene November 16 and 17, in Portland.

A plant near Cape Town, South Africa, expects to manufacture 50,000 tons of Portland cement annually from local limestone.

## RISE IN EXPRESS RATES IS FLAYED

Increased costs of express transportation of milk will mean "one more slice out of the producer, who is already getting less than the cost of production," according to Albert S. Hall, manager of the Oregon Dairyman's Cooperative league, at the hearing on proposed increases in express charges on milk shipments before the Public Service commission Thursday afternoon.

Recently the Interstate Commerce commission authorized a 20 per cent increase on the express charges for milk and cream shipments. The hearing was being held to determine whether this same increase should be made applicable to shipments within the state.

Hall explained as the first witness for the dairymen that he represented an association composed of 240 milk producers. He said that about one-third of the milk shipped to Portland was dependent upon express handling. Hall said that the dairy industry was

already facing a serious situation and that in many quarters herds were being reduced. He said that in the Willamette valley territory adjacent to Portland the production had dropped off 40 tons daily in the last year. He expressed the opinion that further increases in handling costs would be destructive to the dairymen.

Final testimony in the ice cream shipping rates was taken Thursday afternoon. J. E. Dunne, president of the Pacific Coast Ice Cream Manufacturers' association, occupied the stand. He declared that increased rates on movement of ice cream in the state amounting to 25 per cent would give growth to back-room and cellar manufacturing of ice cream in outlying towns now supplied by Portland.

## Cowboys Alleged to Have Robbed Indian

The Dalles, Nov. 18.—Six cowboys from Prineville who were arrested here Monday night and accused of robbing Willie Spencer, an aged Indian, near Wapinitia, on the Warm Springs reservation, were bound over to the grand jury and charged with burglary. The defendants said they were riding to Portland to attend the livestock exposition. The cowboys said they did not break into the house, but merely took hay for their horses from a shed on the Indian's property.

## Why You Should See and Hear the Pathe Phonograph Now

Sooner or later every cultured home will own a phonograph. The question is—which one?

Let your choice be the Pathe, because it has superior features which other phonographs do not possess.

The Pathe plays with Sapphire Ball, ground under the microscope to exactly fit the record grooves. This tiny jeweled ball is indestructible and will play a thousand records without injury to the records or itself. Thus scratchy needles which need incessant changing are done away with.

And the tone! You have never heard such marvelous life-like tone reproduction, unless you have listened to the Pathe.

Yet the Pathe costs no more than the ordinary Phonograph

If you wish to benefit by the special terms of our nation-wide DEMONSTRATION SALE

BUY YOUR PATHE NOW!
