## Couch School Kiddies Receive Word From Afar

**G**EOGRAPHY may be learned in numerous ways, but the Couch school kiddies have about the most interesting way of all of learning it. They are learning all about Australia and New Zealand. The two following letters show how. These letters, together with about 50 others, were sent to the children by youngsters living in Australia and New Zealand, who know all about their own islands, just as Portland kiddies can tell about Mount Hood and Oregon's industries. A couch child is writing to Australians and New Zealanders, so that both countries are going to understand each other before they are through—at least so far as the kiddies are concerned. Douglas Fox, 624 Northrup street, has received the following letter from Jim Daly, who lives in New South Wales:

Dear Jim, I have just read your letter which was published in a paper called Education. I thought it very interesting. I live in the Riverina district in a little country village called French Park. My school is situated on a branch line. It is not far from the city of Sydney. Our school is built of weather board. There are only 20 pupils attending my school.

The chief industries of our country are wheat and wool growing and cattle raising. We export wheat, butter, frozen meats and bacon. We have some of the finest sheep stations in the world. We have a cave far more beautiful. It is called Limestone. It is said to be the only one of its kind in the world. We have some fine birds, such as the galah, which has a beautiful red and blue plumage. It is called another beautiful bird, with white wings and black breast. It is a very friendly bird and it likes to sit on a post near our school window and sing to us. The lyre bird is another beautiful bird. It is said to be able to imitate any sound, even the sound of a whip. It is a very timid bird. There are a lot of other birds that I might tell you about some other time.

There are a lot of animals, such as the possum. It is a small animal with pretty gray fur and has a long tail which curls up like a fan. It likes to eat and feeds at night. Then there is the platypus, which is a funny animal with a webbed foot like a duck's. It has a body like a rabbit and makes a burrow in the ground and lays eggs. There is also the kangaroo. It is the largest of all Australian animals. If it is chased by a dog, it will throw its body up in the air and then it will then if it escapes it will come back and pick the baby up again. It has a long, thick tail.
