

# FEDERAL COURT TO HEAR CASE OF MEN HELD FOR KILLING

Federal Judge Charles Wolverton Monday denied the motion of District Attorney Walter Evans and Barnett Goldstein to quash the writ of habeas corpus cum causa in the Robert W. Hedderly case, and upheld the contention of United States Attorney Lester W. Humphreys that the three agents are entitled to a trial in the federal court. The agents are W. E. Wood, James J. Biggins and Delazon C. Smith. The judge in his written opinion overruled practically every exception taken by the district attorney's office. This means that the county grand jury indictment charging the three revenue agents with the involuntary manslaughter of Hedderly will be tried in the federal court and not in the state courts. City police who participated in the shooting are E. M. Jackson and William D. Morris.

# We Send Free the Pepsodent needed to make this ten-day test

- Multiplies** the salivary flow—Nature's tooth protector
- Multiplies** the starch digestant in the saliva
- Multiplies** the alkalinity of the saliva
- Fights film** in two efficient ways
- Polishes** so teeth glisten and film cannot easily adhere

# Watch these five effects Repeated with every application

Dental science has found ways to bring these five desired effects whenever you brush teeth.

Leading dentists everywhere advise this method now. Millions of people already employ it. Ask us to send it free to you, and see what it does in ten days. It will be a revelation.

So dental science has for years sought ways to fight that film. Efficient ways have now been found and proved by convincing tests. Authorities approve and advise them. And the teeth of millions are already being protected by them.

The methods are combined in a dentifrice called Pepsodent. And a 10-Day Tube is offered free so all may quickly know it.

**Quick, visible results**

The benefits of Pepsodent are quick and apparent. You see and feel them every time you use it. Within ten days you'll realize well how much this new way means.

One ingredient is pepsin. Another multiplies the starch digestant in the saliva, to digest starch deposits that cling. The alkalinity of the saliva is multiplied also, to neutralize the acids which cause tooth decay.

Two factors directly attack the film. One of them keeps teeth so highly polished that film cannot easily adhere.

The film itself is twice a day combated in most effective ways.

**To combat the film**

The purpose is to combat film on teeth. Film is that viscous coat you feel. It clings to teeth, enters crevices and stays. Old methods of teeth cleaning did not end it. So month after month, on countless teeth, it may do ceaseless damage.

Most tooth troubles are now traced to film. And those troubles, despite the tooth brush, have been constantly increasing. So film-removal is nowadays considered all-important.

**It dims and destroys**

It is the film-coat that discolors, not the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea.

**Millions of white teeth**

Millions now use Pepsodent. The glistening teeth seen everywhere show one thing that it means.

To children it is most important, for young teeth are most subject to decay. Men who smoke and stain the film will see conspicuous effects. Women's teeth will be made to look their best.

**Everyone should know**

Everybody, young and old, should know of these effects. Old methods of teeth cleaning do not bring them.

Send the coupon for the 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear. Watch all the results, and the book we send will tell the meaning of them.

Do this for your sake and the children's sake. It means whiter, cleaner, safer teeth. It means results you want and which you cannot get without it.

Cut out the coupon now. This is too important to forget.
