

## BRITAIN AND ITALY OPPOSE FURTHER ZONE EXTENSIONS

By A. E. Johnson  
Special News Staff Correspondent  
London, March 24.—Great Britain and Italy do not approve and will not permit any further extension of the occupied zones in Germany before the first of May and it is believed that by that time the situation will have changed materially.

The final allocations of Upper Silesian territory in conformity with the results of the plebiscite certainly will provide for Germany's retention of the industrial, coal and other mining districts.

These declarations were made without qualifying phrases by a government official interviewed by the United Press.

Great Britain and Italy have reached their limit, he said, in the concessions they are willing to make to satisfy the craving of France for what he called "military displays." The official hoped that the recent extension of the occupied zone would be sufficient to meet the internal demands upon the French government.

Downing street, according to this informant, does not anticipate any further developments before May 1. The Italian elections and Rene Viviani's pilgrimage to the United States are expected to alter the situation as to Germany's reparations before the next conference of the reparations commission is held.
