FEDERATION MAY NOT TAKE PART IN DEMONSTRATION

By Norman Hagood
(Editorial Writer, Universal Service)
Washington, March 31.—There seems to be a good deal of doubt about the attitude of the American Federation of Labor toward the amnesty effort that focuses here on April 13 and 14, the second anniversary of Debs' imprisonment and the fifty-sixth anniversary of Lincoln's death.

The amnesty committee of the American Federation of Labor did some hard work to make the effort of those days a success. What it took a stand against were merely two features. One was picketing the White House, which has been dropped and which was energetically opposed by Eugene Debs himself. The other was a demonstration to congress upon the hill. This may also be called off.

MISTAKE ABOUT WORD
A mistake has grown up, I think, out of the doubtful use of the word "demonstration." It was used to describe the proposal to carry on some kind of an affair with congress and was read as meaning the whole program of the two days.

On that program there are several points that stand out as interesting and everyone of them as legitimate at least as the presence of the lobbyists of the big corporation with whom this town is now crowded. I do not predict that my respectable friends will believe this, but there are a number of things my respectable friends do not grasp.

SENATOR TO PRESS VOTE
A resolution for general amnesty formerly introduced by Senator France will be reintroduced by him, and the same resolution will be introduced in the house, the only existing difference of opinion being on whether the petition that is being signed all over the country should be brought to capitol hill by a delegation, meeting in the American Federation of Labor union station, or whether it should merely be handed to Senator Sterling of the judiciary committee, and to some one member of the house. That seems a fairly small point to have any trouble about.

The real question is this: Suppose that point is yielded, will the amnesty committee of the American Federation go on with its work and take part in the proceedings?

PROGRAM AGREED ON
The main features of the two days' proceedings are entirely settled and entirely agreed upon. They are not Socialist. They represent the shades of liberal opinion. The Farmer-Labor party holds a convention here a couple of days before the amnesty days and they will leave a delegation to take part in that day's proceedings.

In the first place there is the petition from all over the country. Many of the unions working to swell this petition are members of the A. F. of L. Then there is the mass meeting, to be addressed mainly by speakers who are not Socialists. Indeed, it is now planned that there will be only one Socialist speaker. Among those who are asked to address the mass meeting are Senator France, Jane Adams and the Rev. John Haynes Holmes and such labor leaders as John Fitzpatrick, president of the Chicago Federation of Labor, and Johnson of the machinists.

CLERGYMEN TO CALL
There will also be a visit to Washington by a special delegation of clergymen, now being selected by the Rev. Percy Suckney Grant. This feature may seem inappropriate to some, but it is a fact that there are a certain number of clergymen still at large who believe in the simple messages of the New Testament. Many of them ought, no doubt, to be in jail along with those who are already there.

Einstein's Theory To Be Demonstrated By Scientific Film

(By United News)
Berlin, March 31.—Germany is producing at least one film which the American reformers probably will be glad to admit to American movie theaters without censorship. It is Professor Nicola's cinema demonstration of the Einstein theory of relativity, with a scientific scenario prepared by a group of internationally famous scientists. Quite lucidly this graphic reel explains the complex reasoning of Professor Einstein for the enlightenment of the average lay mind. There are many animated drawings alternating with natural photographs, illustrating the complicated movements of the planets, light and atmosphere. All the stock tricks of the studio are requisitioned to explain a theory which the public has so far been unable to grasp from lectures or the printed page. The only element which may be construed as exploitation of the sex appeal is that pertaining to the attraction of bodies; but, as they are astral bodies, Professor Nicola confidently hopes censors will let this part of the production stand.
