Change in egg market sentiment here has been due for some days but was slightly delayed. There was a noticeable decrease in offerings of eggs at practically all points recently.

Shipments to the East are being resumed by coast centers, although most of the movement at the moment originates in California. Cold storage operations continue here, but on a more limited scale. The recent advance in the price has stiffened the backbone of the trade considerably. siderably selling price of extras has been moved as high as 24c a dozen to retailers, but there is little business in such offerings because of the plentiful stock of ordinary quality.
