Remedy for Hasty Divorces Suggested By Judge Bingham

Bingham of the Marion county circuit court before members of the Salem Commercial club at their weekly luncheon Monday noon. The establishment of an intermediary court on the plan of the Portland court of domestic relations where couples in difficulty could go for advice, was urged by Judge Bingham as a cure for a part of Oregon's divorce problem. He also urged that a period of 30 days be required to lapse between the filing of a divorce complaint and the granting of a decree, on the theory that such a delay would in many instances make for reconciliation.

Salem School Levy Budget Defeated; Must Cut Expense

Salem, Or., June 21.—Patrons of the Salem school district Monday defeated the proposed 10-mill tax levy by a vote of 488 to 378. This, it is understood, will necessitate the elimination of the domestic science and manual training departments from the Junior high schools, the dismissal of the school doctor, the school nurse, librarian and probably the athletic and physical director of the high school, in order to come within the budget allowance under the 8 per cent limitation.

The issue at Monday's election involved a levy of 1 1/2 mills above the levy permitted under the constitutional limitation, amounting to approximately \$15,000. L. J. Simeral and H. H. Olinger were elected to membership on the board of school directors without opposition.

The retail clothier is far ahead of merchants in other lines in the race back to normalcy, and the reductions in the price of clothing to the consumer frequently are greater than justified by the wholesale cost, according to Charles E. Fry of Chicago, secretary of the National Retail Clothiers' association, who spoke at a dinner given in his honor at the Portland hotel Monday night by the Oregon Retail Clothiers' association.

Fry said: "Statistics compiled by the national association covering more than 1000 leading clothiers of the country show that reductions of from 25 to 50 per cent have been made."

About 50 retail clothiers from various sections of the state were present at the meeting. The national secretary was officially welcomed to the state in address by C. P. Bishop of Salem, president of the state association; Ben Selig, vice president; Secretary McLean and Gus Kuhn of Portland.

What a difference that tiny filament of tungsten makes!

The use of tungsten as a reproducing point was a real discovery and an actual invention. Its soft fibrous qualities were what had been sought for years.

This truly remarkable metal always insures a perfect reproduction of the music and at the same time gives long life to the records. The tungsten wears itself away rather than the records.

You get these advantages only in the Victrola Tung-tone Stylus—the Victor Company patented the stylus composed of tungsten and therefore has the exclusive right to the use thereof in any form of talking-machine needle.

Three tones—extra loud, full, soft. The new extra loud stylus will be largely used for dance music and outdoors. 10 cents per package of four points—enough to play at least 1000 records. Semi-permanent. Changeable. Sold by all Victor dealers.
