An exclusive used car dealer cannot afford to rebuild his cars and sell them at or below market prices.

By is only because we are depending on our new car sales for our profit and operate an elaborate used car department to further the sale of these new cars that we can afford to give so much value for the mostly expended.

Good cars priced so as the give good value sell with baganin storre case and the volume of business blatained shis way does not limit the number of cars we can accept in anchange on our new cars business. Our new ear business, therefore, is brought to a maximum volume and our eventual prefit is accordingly satisfactory.
