ers, scoring Genin ahead of him, the Beavers' inner defense west to pieces and the Vernon Tigers copped the first game of the series, 7 to 4. The Mackmen looked like champions of the world for two innings, with Cy Johnson pitching like a veteran, but in the third inning Jim Poole messed up a pop fly and "Pep" Young's over-anxiousness to complete a double play gave the Tigers a trio of runs. **Initial Game** 

Three singles in a row and two in-field outs gave the Mackmen two runs in their half, putting the locals in the lead again, but "Ham" Hyatt tied the count in the fifth with a home run clout over the right field fence. In the sixth inning, Poole again gummed up the cards by making a wild heave to second on a sacrifice.

heave to second on a sacrifice. This unnerved Johnson and he developed a wild streak and hit "Duke" Cross, who replaced Bob McGraw on the mound in the second inning, filling the bases. JOHNSON IS RETIRED

A long sacrifice foul to Wolfer reone run and Chadbourne squeezed another over with a perfect bunt. Edington's single, which scored Cross, sent Johnson to the showers. Sam Ross finished the game without being scored on.

Cross, who gets credit for the victory was recently recalled from the Tacoma Pacific International club by Vernon. He is a promising pitcher. He is only 19 years old. He hails from Arizona. The Beavers had lots of chances to score, but three double plays wiped away these opportunities.

When heated, water escapes from the radiator in the form of steam. In the same way oil vapors pass out through the breather pipe when the oil is subjected to engine heat. Low evaporation loss is an indication of the oil's lubricating quality.

Cycol reduces evaporation loss. It has the stability to withstand terrific engine heat owing to its peculiar chemical characteristics.

Excessive loss of oil through evaporation means that the oil is not suitable to withstand engine heat. Poor oils contain a large percentage of volatile and nonlubricating constituents which are liberated when subjected to operating temperatures and pass out through the breather pipes as vapor.

Power and mileage are reduced. Some oils lose as much as 50% in evaporation during a 10 hour run.

Scientific tests in our special motor laboratory show that evaporation loss is greatly diminished with Cycol in the motor. That means better lubrication and more mileage.

Cycol is the new and different motor oil. It is free from destructive "sulpho" compounds. These are removed by the new Hexeon Process, used only by us. Oils containing "sulpho" compounds break down rapidly under engine heat.

Cycol-ize your motor. Clean the crank case-not with kerosene-and refill with the correct grade of Cycol as shown by the Cycol Recommendation Chart. The price of Cycol is 25c to 35c a quart according to grade.
