Local Association Objects to Higher Tax on Corporations

The Portland association of building owners and managers, in common with the other 60 associations of the national association, is profesting against the passage of the clause of the Fordney bill increasing the tax on net incomes of corporations. This bill, known as the revenue act of 1921, was introduced by Representative Fordney of Michigan and passed the house on August 20. provides that the tax to be paid by corporations on their net incomes shall be ncreased from 10 to 12% per cent, in lieu of the excess profits tax. Tuesday's dispatches said the senate committee on finance had agreed to support the recommendation of Secretary of the Treas-ury Mellon, that the increase be fixed

at 15 per cent. "In view of the fact that corporations holding real estate for investment and improvement never come in the class of those having excess profits, they will be compelled to bear the entire portion of this increase," says Charles S. Hol-brook, president of the local association. "This is held to be manifestly unfair, as real estate already bears too large a share of all state, county, port, munici-

pal and school taxes." The building owners of the country say they are not asking for the elimination of the entire tax. If, in the final windup, it is found actually necessary
