farmers might have lost, in the mass, \$10,000,000,000 in their farming

operations and still be \$35,000,000,000 ahead of the game. And that,

in a general way, is precisely what happened. Therein, Mr. Editor, lies

the whole secret of the farmer's prosperity in the past 20 years, and, inci-

dentally, the prosperity of everybody else. Bulk the farmers all together

and take this \$45,000,000,000 away from them, and how much would

Here it is in a nutshell: Legitimate farming has never paid back

his land. A year or so ago this increase was suddenly arrested and land

values began to slump. Credit had frozen solid, crops would not even

pay the cost of raising, bankers were calling their loans; and the farmer

quit buying simply because he had no money to buy with, Right there

Loaning money to the farmer is only a makeshift. What he needs

is a square deal, not a sop in the form of credit, and there will be no real

relief for the rest of you until he gets it. There will be no more increase

in land values for the industrial world to prosper upon, and farming

must be put upon a basis of legitimate profits. Raising raw material

for food and clothing must be made to pay its own way or the whole

agricultural world will be a wreck within three years. You city people
