There is very little busi-fresh selects, but there is only a stagk of such offerings in the local Monday's advance of 3c a dozen in pullet Monday's advance of 3c a dozen in pullets was to be expected, in view of the extreme demand for such offerings. Under the present hystem of grading, pullets are practically average sized eggs, and as there is a wide difference between the price quoted for such offerings and the selects, the demand naturally goes into the lower-priced stock.

British Columbia continues to inquire for storage eggs here, but sales in that direction are practically impossible beyond 32c a dozen. To secure this price the quality must be excellent, with all the small stock and dirius removed. Because of the duty on American eggs and the difference in the exchange rates, Canadian firms say it is impossible to purchase anything but the best stock here and at low prices.

These desiring special information regarding market should write the Market Editoregon Journal, inclosing stamp for reply. HOW TO GET BEST PRICES

Sweet potatoes are unusually low priced at this time. There is an oversupply of California offerings in the market and most of the wholesalers are selling either at cost or at 2 loss. Retailers therefore are able to secure their requirements at reasonable values. Some are quoting to consumers as low as 50 a pound. For the Nancy Halls the price is slightly above this.

Very liberal stocks of grapes are being

offers in the retail shops. Most of the dealers are quoting 15c a pound to consumers, a price quite reasonable in view of the lateness of the season. Navel oranges will be offered within day or so, but it is not likely that the ublic will care to purchase such offerings for a while. Usually first offerings are not only high priced, but green and sour. There remain quite fair stocks of Valencias on the market and these are sweet Markets are well stocked with fresh crabs at this time and prices are practically normal

Market for potatoes cantinues topheavy with weakness deminating the general American trade. Very little business is shown in any quarter; practically all primary centers reporting a lack of activity, which is most unseasonable.

Perhaps the chief development for recent days is the fact that while a short time ago Eastern Multinomah and Clackamas growers were unwilling to do business at all, they are now inquiring for business at all, they are now inquiring for business.
