

**MOUNTAIN LION'S  
DESIRE TO KILL  
LEADS TO DEATH**

Curry prospector, Menaced by  
Cougar, Sets Trap by Path—  
Cat's Fury Chills Heart.

The recent adventures of a lone prospector in the wilds of Curry county make as thrilling a tale as many an Edison Marshall story. Mountain lions of the capture of a mountain lion by William Reeves of Brookings, Or.

Tracks six inches across were to be seen next morning in the trail. Many deer had been found killed by this lion at different times, carcasses partly eaten and sometimes covered by ferns gathered by the lion. Many sheep were killed on ranches in the valley below, and the cougar took his toll of colts, hogs and calves. No dogs were available. The cat was never seen in daytime but often followed Reeves at night, particularly through a pitch dark half mile of heavy forest on the mountainside, where he could easily pounce upon his victim from rocks above the trail or an overhanging tree. This was the experience the secretary of the Moose lodge had going home from a meeting when 14 miles in the mountains and unarmed and without light.

A mountain lion is never caught by bait, being a killer of his own meat. He always picks a fresh victim and kills others though gorged (300 annually). Often crippling a wild animal by its jaws, giving evidence of what he would do to a man. The pictures were taken in the shadow of the forest on the brink of a precipice, and it is a powerful difficulty, the lion restless and always changing positions, roaring much like an African lion, and tearing and clawing all within his reach. It is a favorite trick of the cat to open his mouth wide, showing fangs, and flattening ears, giving a loud hiss.

This lion measured close to 19 feet and was an unusually heavy specimen, weighing about 200 pounds.

Reeves believes attention should be given by the state legislature or by congress for placing a heavy bounty on this blood-thirsty animal. His cougar is coated with bars that insulate it and cut in a deer's side strike the cover from a deer's heart. The cougar has a surprise gun could do it with four knives and with which he sucks blood from the pulsing heart. This is often all he does and he keeps killing.

The only successful way to hunt the animals, says Reeves, is with trained dogs, as lions often jump and escape all but the best dogs. A bounty of fifty by the Oregon fish and game commission, says Reeves, is not enough to warrant hunters in keeping dogs and taking time to wipe out this scourge of the deer family. With lions removed, we would have great increases in deer. Much money spent on game wardens could be better spent on a \$100 bounty for each panther and \$25 for cubs, think Reeves. With each female is generally two cubs, sometimes three. They are much more easily taken.

Reeves is a graduate of Lincoln high school class of February, 1894. His brother, J. E. Reeves, was formerly sheriff of Washington county. His mother, Mrs. E. E. Reeves, lives at 465 First street, and his sister, Miss Grace Reeves, is a teacher at Franklin high school.

**MOUNTAIN LION TRAPPED**

Wild animal pictures are not uncommon nowadays, with many a motion picture studio keeping its own zoo, but this picture is the real thing. The mountain lion is seen with his hind leg in a trap, straining to get a crack at its captor. The picture on the left was taken from the log road seen in the other view.

**Family Has Education Fund  
College Loan Keeps Moving**

Walter Quesenberry, the "village blacksmith" and old settler of Rockwood, 10 miles east of Portland on the Section Line road, is the proud father of eight living children. He has some original ideas and one of them is the maintenance of a revolving education fund for the children as they advance to the line where he defines education to be "purely a business matter and not an obligation on the parents." When they start to college the revolving fund begins to roll. It is a loan to that particular offspring, and only dire necessity occasions its being called on. If it is possible for the aspiring Quesenberry to secure the necessary funds by hard work or economy, or both, then Dad is not asked for a loan.

"None of them has ever spent too much because they know they must pay every cent back and they are not noted in college for any costly escapades, I assure you," said the blacksmith.

With the help of this family revolving fund one son has graduated as a dentist and is now a lieutenant in the navy. Another son is about to graduate as a dentist also. A daughter is going through O. A. C., following a sister, who is teaching school after graduating from the state normal school. One son preferred to be an artist and did not take a college course. Two children are now in high school and hope to avail themselves of that revolving fund to some extent next year.

The Quesenberry revolving college fund is not likely to collapse unless some one of the Quesenberry family turns out to be an ungrateful black sheep, which is not indicated.

"In case of a defaulting child of mine, the others would have to make it up or the baby would suffer, and they know it," observed the one-time champion horseshoer of Multnomah county.

**COUNTY HOSPITAL  
WOULD BE EQUAL  
TO ANY OTHERS**

Plans Drawn After an Exhaustive  
Study Is Made of Best Institutions  
of a Similar Nature.

Establishment of Multnomah county hospital on the seven-acre site adjacent to that of the University of Oregon Medical school on Marquam Hill would afford opportunities for the type of clinical instruction which is essential to the work of school and would place the hospital on a par with Johns Hopkins, Harvard, Columbia, Chicago, Northwestern, Pennsylvania and other well known teaching hospitals of the country, according to P. L. Campbell, president of the university.

Plans for the building prepared by Sutton & Whitney were the result of exhaustive study and investigation of the best hospitals of the United States and Canada and details were worked out by the architects in cooperation with the Multnomah county commissioners and the medical advisory board.

**MADE OF CONCRETE**  
Construction is of reinforced concrete, with partitions of hollow tile. The foundations are on bedrock and every precaution has been taken to erect an enduring structure suitable for existing hospital needs of the county. The unit now under construction would accommodate 200 beds, including an emergency room could be added for 275 beds, according to the report of H. A. Whitney to the county commissioners.

Practically 50 per cent of the first unit is devoted to administration facilities, such as storage rooms, kitchens, admission department, offices, laboratories, X-ray and hydrotherapeutic departments, operating rooms and quarters for the superintendent and internes. The boiler house, heating plant, garage, laundry and quarters for employees also are included in the initial construction. Provision has been made for two additional wings with a capacity of 150 beds to meet future needs.

**NEED MORE MONEY**  
The building in its present state requires \$350,000 for completion, according to estimates of the architects and the county commissioners. This sum has been allotted by the commission for expenditure in 1922, and would bring the total cost of the hospital, ready for operation, up to \$1,000,000. In addition to this approximately \$100,000 would be required for parking the grounds and adding finishing touches to the building, according to Whitney.

The amount already appropriated would put the new hospital into commission and allow for the transfer of equipment and patients from the old county hospital at the corner of Second and Hooker streets. According to Commissioner Holman, the appliances now in use at the old hospital would serve for the initial equipment of the new hospital.

The present hospital building was erected about 40 years ago, and was used for many years as a residence. It is a three-story frame structure crowded with 90 beds. Only approximately 250

cubic feet of air is allowed to each occupant, while the building code requires a minimum of 1000 cubic feet. **BUILDING CONDEMNED**

The building now in use has been condemned by eight county grand juries as unsafe. It was also condemned by Fire Marshal Edward Grenfell as an unsafe place to house the sick and disabled, on November 18, 1920. The roof leaks and during rainy weather the basement is flooded. No fault has been found with the management of the hospital in grand jury reports, but in every instance the jury has strongly recommended immediate erection of a new building.

The site of the new hospital on Marquam Hill has been donated to Multnomah county by the University of Oregon for hospital purposes. The location is one and eight-tenths miles from the old postoffice building at Sixth and Yamhill streets.

**Parole Breaker Is  
Taken in Custody;  
To Serve 10 Years**

Hillsboro, Nov. 19.—Peter Rithaler of Cornelius was taken into custody in response to a court order by Judge George R. Bagley and must go to the penitentiary to serve 10 years. Rithaler several months ago was convicted of breaking into a Cornelius drugstore. For this he was given five years. On the charge of stealing an automobile, with which to make his getaway after the robbery he was sentenced to another five years. He was paroled on account of his youth but has not lived up to the terms of the leniency, and revocation followed. Lewis Powell, who operated with had checks in Marion and Clackamas counties, was sentenced to two years and taken to Salem Friday.

**FOUR ACCIDENTS FATAL**

Salem, Nov. 19.—The names of four workmen, who lost their lives in industrial accidents, are included among the 237 accidents reported to the state industrial accident commission for the week ending November 17. They are: Charles Sandberg, driller, Portland; Adolf Antonson, driller, Lyle, Wash.; Eric Antonson, driller, Lyle, Wash.; and Harry L. Thayer, laborer, Portland.

**DALLAS WOMAN, 82, DIES**

Dallas, Nov. 18.—Mrs. Ellen L. Cowley, 82, died Monday at the home of her daughter, Mrs. C. L. Barnes, in this city. She had been an invalid for several years.

**RESULTS SURPASS HOPE**

Willamette University, Salem, Nov. 19.—

**18—The Win-My-Chum services held in Methodist churches of the city this week under the leadership of the Christian associations of the university brought results which far surpassed expectations.**

**TESTS GIVEN INDIANS**

Klamath Falls, Nov. 19.—Tuberculosis tests are being conducted on Klamath Indian reservation by Dr. E. A. Pierce of Portland, assisted by Miss Grace Holmes, who has been conducting a survey, and Miss Lydia Fricke, county health nurse.

**FIRE PROTECTION IMPROVED**

Klamath Falls, Nov. 19.—Better fire protection will be had here with the installation of a fire alarm system and additional fire equipment. For which the city council has voted \$10,000 and \$15,000 respectively. The equipment will include a pumping engine of 1000 gallons capacity.

# JENNING'S The Home of God FURNITURE

Complete Home Furnishers—WASHINGTON AT FIFTH—Nine Floors of Furniture

## Thanksgiving Comes This Week

—Honor the Day With a new Dining Suite!

Mahogany, walnut, oak—which do you prefer? Here are suites in all of these fine woods—suites in rich variety of design and finish, and at prices that you will agree are moderate, indeed, for such quality and such workmanship. Select a suite early in the week and we will put it in your dining room for your Thanksgiving dinner!

**Liberal Credit On Dining Suites!**

## Gifts of Mahogany for Christmas

To make the circuit of our balcony floor is to wander through Fairyland! Here is almost every conceivable Gift of Mahogany, displayed for your convenient choosing. You need only come and pick and choose—we will hold for you anything you may select, and you need only make a modest payment in order to secure it! Come and look, whether you buy or not—you will enjoy looking!

**Metal Guide Signs  
Are Ordered by U. S.  
For Forest Roads**

Several hundred metal guide signs have been ordered by the United States forest service, to be used on roads within the national forests. The signs have an ivory background with raised letters of green. They will be posted in both Oregon and Washington national forest roads.

The Cascade national forest, west of the Three Sisters and tributary to Eugene, is at present the best posted on trail signs of any forest in Oregon or Washington, according to records at the district forester's office.

**Roseburg Company  
Is Improving Lines**

Roseburg, Nov. 19.—The Douglas County Light & Water Company is making extensive improvements both at the generating plant at Winchester and at the sub-station at Roseburg. Seventeen miles of large copper wire, weighing about 10,000 pounds, has been received and a force of 30 men will string the wire from Winchester to Roseburg Sunday. New transformers have been installed in the business district. The facilities of the local plant have long been inadequate but, with the new equipment, it will be possible to give adequate service to the power users.

**Grants Pass Judge  
Jolts Moonshiners**

Grants Pass, Nov. 19.—Judge James Holman today assessed fines totaling \$1250 upon Bob Goff of Leland and Norman Blalock and E. G. Leland of Placer. Patton and Blalock pleaded guilty to moonshining charges, while Goff, who demanded a jury trial, received a fine of \$500 and 60 days in jail when the jury returned a verdict of guilty. The men were placed under arrest upon complaint of Special Prohibition Agent W. G. Smith of Wolf Creek, who alleged he had purchased liquor from the three men.

**UNION OIL PAYS \$21,248**  
Salem, Nov. 19.—Taxes on motor fuel oils paid into the state fund by patrons of the Union Oil company in Oregon during the month of October aggregated \$21,248.68, according to a statement submitted to the secretary of state's office here. These taxes cover sales of 1,615,593 gallons of gasoline and 65,121 gallons of distillate.

**BETTER FIGHT PROPOSED**  
Salem, Nov. 19.—According to telegraphic advices received by State Forester Elliott from Congressman N. J. Stannott, Friday, an item of \$150,000 has been added to the emergency appropriation bill before congress for use in fighting beetle insect infestation in the national forests of Oregon and California.

**CONFERENCE IS POSTPONED**  
Salem, Nov. 19.—The conference on standardization of accounts for electric and gas utilities, scheduled for Portland on November 21, has been postponed until December 4. Members of the public service commissions of several western states are expected to attend.

**Camberough**  
THE FAVORITE NET of the Well Groomed Woman  
THE GUARANTEE: Each net is guaranteed perfect in material and workmanship. Each net is doubly inspected—made of human hair—processed for strength and irremovability—full size—guaranteed—true shades.

THE WESTERN COMPANY  
402 West Randolph, Chicago

## Some Figures

published for the benefit of gas consumers.

With summery, sunny weather almost any gas-appliance will suffice to take off the morning chill.

But when cold weather does come, you want your home warm. It would be unsafe for your family to have to live in an under-heated house.

Therefore, the following figures should be borne in mind in all installations of gas appliances (no matter what make), provided, of course, that they are scientifically built and fully efficient:

NAME	Burns, Per Hour, at Full Capacity	Capable of Heating to 70 Degrees (With the Outside Temperature as Low as 10 Above)
Floor Furnace.....	40 cubic feet of gas	2,750 cu. ft. of space
Bungalow.....	100 "	6,800 "
Pipeless (4 Sec.).....	80 "	5,800 "
Pipeless (8 Sec.).....	125 "	8,500 "
Pipeless (16 Sec.).....	200 "	14,000 "
Gasco (8 Sec.).....	125 "	8,500 "
Gasco (16 Sec.).....	200 "	14,000 "
Gasco (24 Sec.).....	255 "	18,000 "
Et Cetera.....		

Of course, the figures given for cubic feet of space are an average, as much depends on exposure and number of windows.

Multiply the length by width by height of the rooms you are going to heat, which gives you the total cubic feet of space.

Cut out the above table and keep it, either for your future use or to enable you to instruct someone else.

Portland Gas & Coke Co.

## Great Pre-Christmas Sale of Phonographs

We are offering at reduced prices our entire stocks of Widdicomb, Windsor, Emerson, Stradivara Phonographs

in cases of mahogany, walnut or oak. We are offering, too, the most liberal and attractive credit terms on any and all of these fine instruments. If you are contemplating the purchase of a new phonograph as a gift, right now is the time to buy it at a saving.

**Phonographs Regularly Priced \$110, \$115, \$125, \$190, \$215, \$240, \$250, \$290, \$300, \$325 SELLING AT ONE-THIRD LESS!**

Original prices are on each instrument. When you buy, we subtract one-third and charge you only the remainder! AN OPPORTUNITY!

### —a new Range!

## The OPAL JUNIOR Wood and Coal Range

### \$59.75

"Western-made for Western Fuel and Western Homes"

Come and let us show you this new range—a range guaranteed in every respect! Here is a range made right in Portland; it exemplifies honest construction from materials of high quality. The vital parts of the range are made from "Armco" rust-resisting iron. The firebox is the Pacific Northwest type for Western fuel, designed and built to bring the fire and the heat close up under the cooking utensils—a splendid fuel-saving feature. The Opal Junior has drop fire-door and drop oven-door, sanitary base, duplex grates for wood or coal, polished top, porcelain splash-back and oven-door panel, and plain nickel parts.

If any part should ever need replacing, it can be secured at once without sending away for it, as the entire range is built here at home.

**FOR A WONDERFULLY GOOD RANGE AT A MODEST PRICE, COME AND LET US SHOW YOU THE OPAL JUNIOR!**

Complete Stocks of Rugs, Carpets, Linoleums, Curtains, Draperies and Upholstery.

**Exceptionally Rich and Versatile**

IN A steady stream of Oriental beauty, rug young and old keep pouring into our stores. We have rugs mellowed by age, the colors subdued and beautiful. We have pieces of great brilliancy, purely decorative in purpose. We have rugs large and small, some warming in their influence, others cooling. Some are ornate and intricate in design, others simple and subdued in tone.

With the proper Oriental Rug to build upon, unstinted success can be achieved in your home. Consultation involves no obligation.
