Alkali In Soap Bad For The Hair

Soap should be used very carefully. If you want to keep your hair looking its best, most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and ruins it.

The best thing for steady use is Multiflex coconut oil shampoo (which is pure and greaseless), and is better than anything else you can use.

One or two teaspoonful of multiflex will cleanse the hair and scalp thoroughly. Simply moisten the hair with water and rub it in. It makes an abundance of rich, creamy lather, which rinses out easily, removing every particle of dirt, dandruff and excessive oil.

You can get Multiflex coconut oil shampoo at any pharmacy. It's very cheap, and a few ounces will supply every member of the family for months. Be sure your druggist gives you Multiflex.
