NEW IMPORTANCE AS A WOOL CENTER

nd in importance, next to Bosin the whole United States, and by far the most important on the Pacific coast was indicated by the wool auction held here a few days ago, at which 1,000,000 pounds of wool from Idaho was so successfully auctioned d the highest prices that have prefailed for over a year.

The wool disposed of at this auction. lowever, was but a very small part of he wool business of this port. Dealers wilmate that there is received in Portand between 20,000,000 and 25,000,000 bunds of wool annually. Of this huge amount, perhaps 11,000,000 pounds are med by the woolen manufacturers of this district and the balance shipped to the Atlantic coast.

"Shipments of wool are now made alfirst entirely by water. Producers can dip from many interior points by rail to Portland and thence to the Atlantic mast by water, cheaper than they can ship direct east by rail. Wool is received here from Oregon-which proluces annually about 12,000,000 poundsfrom Washington, Idaho, Montana, Wyoming, Northern California and some from Colorado and Utah. Portland has the advantage of a shorter haul from the greater part of this producing distriet, and is on a parity with San Frangisco and Seattle on the balance. Due to advantages in marketing, many producers, everything else being equal, prefer to ship to Portland.

PORTLAND SHIPPING POINT Shipment is usually made to Portland in bags, and it is baled here for water shipment to the East. Water traffic are now 90c per hundred, while rail rates run about \$1.35.

The development of the industries ng woolan goods has been vary id. Facing the sharpest competition ughout the country, the Portland ufacturers have nevertheless develat an astonishing rate. This is have here a moist, humid atmosre that is a great help in carding spinning, since it keeps the tiny worked into yarn or cloth, the same itions can only be approached in East by the use of mechanical The same climatic condiproduce wool of a softer texture It is grown, and the soft water used washing it is of further assistance

ENORMOUS INDUSTRY he Portland district is now the greatmanufacturing center of woolen is west of Cleveland. The industry now engages about 2000 people and value of its products will run about 00,000 annually. The highest grade virgin wool products are made. It said that nothing superior in correlines is made anywhere in this ntry, and many instances are known Fe Portland woven goods have been ed superior in every way to improducts of the same weave. most notable of the producers of

The new Portland garment factory of the Oregon City Woolen Mills will soon be running to capacity in the building formerly known as the Furniture Exchange, Grand avenue and East Stark street. About 150 operatives will be employed for the 125 power sewing machines, the power cutters and the other equipment required for finishing the company's wool garments.

The new plant is a consolidation of the factories No. 1 and No. 2 which have been located on Russell street. Products of this new shop will include mackinaws, flannel shirts, trousers, ounging robes and bath robes. All of these will be made from the woolens woven in the company's mills where additional equipment has been installed for exclusive overcoat manufacture, and for increased production of other Oregon City garments.

The new factory is a four-story build-ing, 100x100 with full basement. There

is also a mezzanine floor where a lunchroom for employes will be installed. The building is especially well suited for the purposes for which it is being adapted, as there are windows on all des, providing an abundance of light

and ventilation. A truck line will be used to haul the woolens from Oregon ity to the new plant.

With arrangements practically com-pleted for the display of Oregon made goods in show windows throughout the city, and equal prominence given to the same products on the shelves, counters and showcases of the merchants of Portland, it is believed that the importance to the people in such a forceful way that

buying will be materially stimulated. Several windows are already decorated for Oregon Industrial week, and con-siderable expense has been incurred in making them attractive. A great many others have been arranged for. It is anticipated that perhaps 100 show winlows will be devoted to such displays all of next week. Another feature of in a strenuous campaign for the Northpublicity is the streamers that have been printed on an orange paper for both windows and automobile wind-One streamer reads "Are Oregon Labels on Your Tables?" and the

other, "Oregon Industries Week,"
The Associated Industries have also provided a set of eight large show-cards bearing the "Oregon Made" trade mark and suitable legends. These are for use either with counter displays or with window displays.

Among the firms making special dis-plays for this week are: Oregon City Woolen Mills, Pendleton Woolen Mills, Oregon Worsted Co., Jantzen Knitting Co., N. W. CAUGHT WITH THE GOODS

Random observations in the hom field of The Journal's hawk-

The Ad club Hi Jinks was sure some Did you notice that the winne Yep. Chief Pow Wow, the Noble Red Skin, was of the gentle—and inquisitive sex. She fooled even the judges.

Ahem-yes, we won a prize, too. After about a hundred others had been warded and we were still out of luck nittee had a good many things on hand not yet used, so they called on all others who had not won to come for ward and get a prize. We got away with a perfectly good package of pancake

"Manufacturing and Selling" says the Portland Coffee Roasters are engaged west trade. One good thing about Port-land coffee-nobody roasts it except those whose business it is to do so. Tired housewives with too much win-

dow, and other, washing are wont to go down and gaze at the Montgomery-Ward building and be thankful they do anyway. Even husbands have been known to be thankful for the same reaon. And they all wonder how many windows there are in this building anyway. W. H. Crawford of the Chamber of Commerce took a week off the other day and went over and counted 'em. Says there are exactly 40,8971/2 small panes of glass in these windows. The other half pane was broken and he did not count it.

In West Salem the Oregon Wood Products company has a real scheme for stillzing waste products. It buys slabwood-four foot slabs-and cuts it up. The largest pieces are made into mop handles; pieces not large enough for mop handles are cut into 42-inch broom handles, smaller pieces are utilized to make toggles for tent ropes, others for plugs for the end of paper rolls. In our role of guide, philosopher and friend we suggest there may still be made from the yet-smaller pieces, clothes pins, matches, toothpicks and splinters.

A Portland tailor imported a beautiful piece of Scotch tweed from England. After he had placed it proudly on his shelves he discovered that the Portland

Jacobs' Oregon City

Virgin Wool

the Wool Is Grown

Made in Oregon ---famous everywhere

From Kennebunkport, Maine, to Astoria, Oregon; from Duluth to New Orleans, Jacobs Oregon City pure virgin woolens are famous for their beauty, warmth and service. Oregon City mills have helped to put Oregon on the industrial map.

Employing hundreds of skilled men and women throughout the year, the Oregon City mills help to increase the payrolls of the state as their products gain popularity.

We dye, spin and weave new Oregon wool into wonderful fabrics. Then, in our own shops, we tailor these fabrics into well-styled garments. The same virgin wool quality has given our robes and blankets a national reputation.

Buying virgin woolens made in Oregon helps build prosperity for Oregon. The whole state benefits.
