- WILLOWCRAFT FURNITURE CO.—Wood Baskets.

WHY Oregon Products Week?

The Meier & Frank Store believes in Oregon products. It is, naturally, the largest user of Oregon products among institutions of its kind. It carries Oregon products in stock continuously.

In addition to its everyday business in home products, this store inaugurated years ago an Oregon Products Week designed to bring Oregon products as a whole more into the limelight and to advance their sales more forcefully by means of special newspaper advertising and window displays.

For this year we planned a more thorough-going campaign or drive than before. More than a week ago invitations were sent out on our behalf by the Associated Industries to Oregon manufacturers acquainting them with our plan of holding an Oregon Products Week from January 30th to February 4th, indorsing it in the fullest way and urging their lively co-operation.

Last Sunday we published in each of the Portland papers a full page announcement to Oregon manufacturers of our readiness to join with them in a great special featuring of their products for Oregon Products Week.

Everything will be in readiness when our doors open at 9:15 A. M. tomorrow. There will be exhibits of Oregon goods throughout the store with special signs calling attention to them. There will be demonstrators in charge of many of the exhibits to give information. There will be educational exhibits, exhibits showing processes of manufacture, working exhibits.

There will be in round numbers 200 Oregon concerns represented in the store, and as many of these produce different lines there are hundreds of diverse displays. We have aimed only at listing concerns that have arranged for special exhibits in the windows or in the departments for Oregon Products Week. We handle many other deserving Oregon products which space will not permit of our listing here, and we have room in our stocks for more of the same worthy character.

So the Meier & Frank Company invites the people of Portland and of Oregon to see these displays, to note the variety and excellence of the goods made here at home and to patronize them.

Let's co-operate. Let's buy Oregon-made merchandise. Let's keep the wheels of industry turning. Thus we shall do much to heighten Oregon's prosperity, to swell her pay rolls, to keep our men and women happily employed.

—FOR A GREATER OREGON.

32 Windows of Oregon Goods Many Working Exhibits

Our windows are a miniature world of industry, a score of them including entire Fifth-Street window frontage showing machinery in operation and various processes of the manufacture of leading Oregon goods. Everyone should see them. They are a liberal education. The younger generation especially should be given opportunity to view these displays. There are also working exhibits inside the store. Everybody is invited to come and see what a great and successful enterprise Oregon Products Week is.
