BUTTER TRADING BASIS IS STEADY

MONDAY DAIRY TRADE Butter, Eggs, Cheese,

cube extra select, flats, Portland San Francisco ... New York Chiengo \$7e Scattle Los Angeles size

one here but prices reflect no change for any Because of the general cleanup of cube but-r offerings here the undertone of the entire ade is in a good position. Country cubes of the better class are generally ranging arothel 34c a pound with 92 score at 35c.

Beat of all at present is the showing for off grade cubes. This stock has been a drag on the market for a number of weeks, but suddenly showed an active tone and moved at prices that were above those that holders had been saking, or expecting to receive. nt movegaent is steady since the latest of prices, although there appears but little that the market was burt somewhat by the low of the butter market at San Francisco the week ending Eriday;

for the week ending Friday.

The San Francisco butter market for the past week showed no great funtuation in prices. The arrival of Australian butter caused a dectine of 1 % c, but the tone of the market was at no time panicky, as was the case following former arrivals. Light production, due to weather conditions, estused a corresponding decrease in receipts. There was also some demand for butter from the South, and Friday the market closed quite firm, with 92 score selfing at 37 % c, the same price as a week ago. Several care of imported butter have gone east and the remainder has some into storage or is on dealers floors. Much of the Pacific coast butter now arriving is showing cold weather defects and the scarcity of real fancy quality is the principal cause of the firm and advancing market. Reports from the country indicate that production will not show much increase before the end of the grount.

Review of the butter markets at New York, Chicago, Roston and Philadelphia for the week continual condensation of the section. Review of the Boston and Philadelphia the Priklay:
Eastern markets were steadier than for some time and until toward the close of the week, prices showed but little fluctuation and stocks have kept moving. There was some some hear kept moving. bloago atoeks continue very light. Foreign outlier was largely responsible for the easier mar-cet at New York. About 3000 boxes of New

het at New York. About 3000 boxes of New Sealand and Australian butter arrived there from Vancouver and they expect to get most of the slipment at San Francisco. Besides this, there were 200 casks of Danish butter. Danish cable prices were reduced 35c to 34c c. 1. f. Receipts also were rather heavy in New York, belief to the higher prices of the past week or a 10 days. Toward the close the markets were easy and unsettled and New York was weak but it seems to be largely due to sentiment, as in the markets. the make has been reduced some and the conof the dealers feel that the present weak-

Market for eggs is ruling just a fraction easier.

SUGAR MARKET IS DOWN A DIME With a drop of 10c per hundred pounds to refinery prices Monday, heal quotations show a similar loss. The drop here was generally ex-pected, although recently it was noted that re-finers were filling orders, a beariah sign.

Market for apples remains active here, with no further changes indicated either here or at primary points. All sorts of apples are today commanding attention. It is noted that some of the peddling interests are selling wormy sto k ORANGE MARKET SHOWING LOSS

By Hyman H. Cohen

It appears to be a runaway market for wheat at this time. Even the private houses of England which make it a practice to send out each morning a bearish cable no matter how much they desire supplies, today actually cabled that the general market was firm and active.

Of special interest to the trade is confirmation of additional foreign business in flour and whest, although none of the orders are in themselves of heavy volume.

Most of the wheat sold is club and the flour is generally club straight. For that reason there is generally club straight. For that reason there is a very keen demand for white club in the local territory, with confirmation of business in the country- as high as \$1.15 per bushel, tidewater track delivery. water track delivery.

Bluestem is still quoted at \$1.30 for choice milling grade, but owing to the scant stock of his variety and grade, the quotation may just us well be higher. It really is not a market Wheat Forced in Chicago Trading Trading Trading Trading Theore was a bulge at the finish as a for oversold pit conditions and unfavorable reports from Kansas. SOUND FAILS IN

gain a part of Portland's exclusive trade. in the Willamette valley, have failed rates which were proposed to become effective this week between Seattle and Portland and applicable on traffic to points south of Portland to Roseburg and north of Seattle to the Canadian border. This information was received today

by John H. Lothrop, secretary of the Portland Traffic & Transportation association, and marks the termination of long effort upon the part of interests to the north to trade a part of their exclusive territory to the north of that city for a part of Portland's exclusive territory to the south.

INCREASE PROPOSAL

commercial interests, this tariff was later withdrawn and new rates on a 75c scale were proposed. These rates also were protested by the same interests, but after hearing by the interstate commerce commission and the department of public works of Washington, were approved and became effective on December 1, 1921. The 75c scale was regarded by the carriers as unduly low, but nevertheless it was felt that at those rates they would secure a fair share of the traffic. PROPORTIONAL RATES

Upon the urgent request of Seattle

shippers, strongly supported by the department of public works of Washington, the carriers put in proportional rates-60c first class, 50c second class, 40c third class and 35c fourth class, on account of certain less than carlond proportional commodity rates carried by the Southern Pacific from San Francisco to Portland, which were used in constructing through rates to points in the oped, however, that there was practically no movement from San Francisco to points in the Willamette valley upon those rates. Any benefit accruing to Seattle under the new proportional rates, which would apply on all L. C. I. traffic, would result in corresponding loss to Portland. ORDER CANCELED The proportional rates were first pub-

lished to become effective December 1. but were ordered canceled by the interstate commerce commission because they notice without authority. They are republished effective February 5, but suspended upon protest and request for suspension filed for the Portland Traffic and Transportation association, at the earnest solicitation of its member who felt that the proposed proportional rates were unduly preferential to Seattle and unjustly discriminatory against
