

### OREGON JERSEY IS TOP OF BREED IN BUTTERFAT OUTPUT

Oregon has for several years been called the Jersey center of the world. It now has still another reason to claim this honor. Lad's lota, a registered Jersey cow owned by S. J. McKee of Independence, has just completed a year's record of 13,120 pounds of milk and 1047.84 pounds of butter fat. This 4-year-old cow now takes her place as champion butter fat producer of the Jersey breed and brings to Oregon the honor of having seven of the eight class leaders of the breed.

Lad's lota is a consistent producer. She was a gold medal cow before starting her last test, producing before she was a mature cow a record of 12,048 pounds of milk and 754.28 pounds of butter fat in a year. During her entire last test she was milked by her owner with the exception of five milkings when, because of an injured hand the milking was left to the herdsmen, Paul Hockema. McKee being modest wishes to give credit for this wonderful record to his wife, his herdsmen and to Dr. Lytle, state veterinarian, who supervised the feed ration before and during the test. He also prescribed for the cow while she was down with

milk fever at the beginning of the test and at one other short period of sickness during the test.

**HIGH RECORD CONSTANT**

One remarkable feature of this year's test was that due to the large flow of milk and the constant high record, only two relays were called for and during the last 15 days of the test three different official testers took turns in supervising her milking and testing it to check up on previous records.

Although under severe nervous strain due to the presence of strangers during the last half month of her test, this cow came up true to form and constantly produced an average of two and one-quarter pounds of butter fat each day during the last 15 days, proving to the satisfaction of any skeptic that the record was bona fide in every detail.

**WAS FORMERLY FEEDER**

McKee has been in the purebred business only for a few years, but before that time was recognized as a feeder and breeder of cattle. As also his brother, Harry D. Iliff on a neighboring farm who owns another class leader of the Jersey breed, St. Mawes Lad's lota. It is interesting to note that Lad's lota is sired by Rhina, Lad of S. B., a gold medal bull with five gold medal daughters, and her dam is Ruth Violet, by Middleton Fogie, who has several daughters in the register of merit. Other Jersey class leaders credited to Oregon are: Senior yearling, St. Mawes Lad's lota, owned by Harry Iliff, Independence, Or. Production, 87747 pounds fat, 11,729.05 pounds of milk.

Junior 2-year-old, Pearly Exile St. Lambert, owned by Walter Domea, McCoy, Or.; 12,343.05 pounds of milk,

818.61 pounds butter fat.

Senior 2-year-old, St. Mawes Pretty Lady, owned by Lester Daniels, Tillamook, Or.; 12,850 pounds of milk, 824.35 pounds of butter fat.

Junior 2-year-old, Poppy's Dorthea, owned by F. E. Lynn, Perrydale, Or.; 17,204.05 pounds of milk, 784.35 pounds of butter fat.

Junior 4-year-old, Old Man's Darling II, owned by Pickard Brothers, Marion, Or.; 14,421 pounds of milk, 931.04 pounds of fat.

Senior 4-year-old, Vive La France, owned by Pickard Brothers, Marion, Or.; 14,215.07 pounds of milk, 1031.44 pounds of fat.

A Massachusetts cow, Lass 66th of Hood farm, holds the record for the senior 2-year-old cow, the only record not now held in Oregon, and rumor has it that two Oregon Jersey cows are now trying for this honor.

### Three Indian Boys Prefer Jail Life To Chemawa School

Life in the Multnomah county jail is to be preferred to life at the Chemawa Indian school near Salem, said three Indian youths who were sentenced to serve three months each in the prison Wednesday afternoon by Federal Judge Bean.

"We can at least get decent food in the jail," one of the Indians said.

The defendants were Henry Bean, Arthur Paul and John Wilson. Several days ago they decided they would quit the school and make their way back to their homes in Alaska. Bean came from

Kake, Paul from north of Nome and Wilson from Honah. They had no money to pay their fare, so they stole considerable clothing and sold it to obtain funds. The trio was arrested at Seattle a few days ago and returned here for trial. Each pleaded guilty when arraigned.

The youths met claimed they would not have fled the school had they been treated and fed properly. Their complaints were not considered by the court.

On their way back to the county jail from court the three told Deputy United States Marshal Frank Snow that they preferred jail life to life at the school, principally because they have been fed well since their arrest.

### Congregation Won't Let Pastor Resign

Rogue River, April 12.—Rev. A. Wolfe, pastor of the Rogue River Presbyterian church, is finding difficulty in convincing his congregation that he should resign. As he intends to leave Rogue River he tendered his resignation at a meeting of the congregation Monday night. His parishioners refused to accept it and another meeting is to be held to settle the question. Finances of the church have more than doubled in the last year and a large community hall has been constructed.

**HOT LAKE ARRIVALS**

Hot Lake, April 12.—Arrivals at Hot Lake sanatorium Monday were: Clyde Kiddie and Mike Griffin, La Grande; A. G. Pappas and J. G. Gibson, the Dalles; Mrs. N. Nekoa, Baker; Mrs. G. W. Marshall and Ester Marshall, Weiser, Idaho; Mrs. H. Ferring, Starbuck, Wash.; Mrs. J. H. Herr, La Grande; Ad

### Local Company Permit to Develop Snake River Power

Washington, April 12.—(WASHINGTON BUREAU OF THE JOURNAL.)—The Pacific Power & Light company has filed an application with the federal waterpower commission for a preliminary permit for development of 400,000 horsepower on the Snake river in Oregon, Idaho and Washington. A plan is outlined for a series of 10 concrete dams with a total head of 500 feet, covering 70 miles of river from the mouth of the Grande Ronde river to a point 30 miles below Homestead, Idaho.

**DEVELOPMENT OF PROJECT WOULD ADVANCE INDUSTRY**

The application for water power development permit would mean a considerable industrial development in the lower Snake river district between Astoria and Homestead, Idaho, according to Guy W. Talbot, president of the Pacific Power & Light company.

Talbot authorized a statement that the application is preliminary to engineering surveys to determine the feasibility and cost of the project.

It was admitted, however, that applicants for power would provide ample justification for the development, provided it is physically practicable to make the improvement.

## Are You Ready for Easter?

Easter, the most joyous of all times, an occasion for which every one wishes new clothes, now finds us well supplied to serve your every want.

With our store filled with all the pretty new clothes, it is impossible to describe the many surprises which await you here. We simply say, "Come and judge for yourself."

### The Mannish Suit

A passing glimpse is all you'll need to satisfy yourself of the exceptional values offered in these Tweed and Homespun suits.

They are shown for the first time tomorrow, in the sport tailored effects. Mannish pockets in the mannish mixtures. Especially priced for Easter shoppers.

**\$29<sup>50</sup>**

Customers in 1921

Bring in the entire family, Father, Mother and children. Buy the clothes you need for all of them. Arrange to pay us later at your convenience. This is how "Credit-Gladly" served 129,417 customers last year

Washington at Tenth St.

**The MOTOR OIL FREE FROM DESTRUCTIVE "SULPHO" COMPOUNDS**

Produced under the new HEXEON process.

**Why his customers demanded Cyclo**

There must be some unusual reason why so many discriminating engine owners are demanding Cyclo. The reason is because Cyclo is more durable in use and gives more efficient lubrication—proved by performance in the motor.

This is because Cyclo is made by the new Hexeon Process, used exclusively by us. This process is a scientific oil refining development, perfected after intensive research and experimenting. It solves the problem which lubricating oil scientists have for years tried to solve. It economically removes destructive "sulpho" compounds which cause ordinary motor oils to break down and thin out rapidly under engine heat. They are the power wasters—the money wasters in motor oils.

The advantages gained by using Cyclo are evident in the better performance of the motor, the savings in oil and

fuel, and economies in maintenance. Because Cyclo is free from destructive "sulpho" compounds.

There is a grade of Cyclo to correctly lubricate your engine. It is specified on the Cyclo Lubrication Chart. Cyclo will mix with other oils, but it is advisable to use it exclusively. Drain out the old oil. Pour in two quarts of the grade of motor oil specified on the Chart (not kerosene or so-called "flushing oils"). Run the motor for five minutes. Drain and refill with the correct grade of Cyclo Motor Oil.

The difference in your motor's performance and in upkeep costs will tell you why the demand for Cyclo is increasing. To be sure of getting Cyclo—buy from the dealer who shows the Cyclo sign.
