YELLOWSTONE NATIONAL PARK
Nature's Most Wonderful Laboratory and Out-of-Door Paradise
"The wildest geysers in the world, in bright, triumphant bands, are dancing and singing in it amid thousands of boiling springs, beautiful and awful, their basins arrayed in gorgeous colors like gigantic flowers; and hot paint-pots, mud springs, mud volcanoes, mush and broth cauldrons whose whole contents are of every color and consistency, splash and heave and roar in bewildering abundance.
"Here, too, are hills of sparkling crystals, hills of sulphur, hills of glass, hills of cinders and ashes, mountains of every style of architecture, icy or forested mountains, boiled soft like potatoes and colored like a sunset sky.
"The air is electrical and full of ozone, healing, reviving, exhilarating, kept pure by frost and fire, while the scenery is wild enough to awaken the dead."—John Muir.

To Europe

A new triumph in Ship Building

IF YOU are going to Europe you can now travel on swift, new passenger liners that represent a supreme achievement in shipbuilding. The fast, twin screw, oil-burners of the "535" type, owned by the U. S. Government, have become famous on every sea. Two of them; the President Harding and the President Roosevelt, operated for the Government by the United States Lines, have been placed in the service between New York and Plymouth, Cherbourg and Bremen.

Every device of the modern shipbuilder's art has been lavished on these new ships. They are at once incomparably safe, supremely luxurious and unusually fast.

Write for Booklet
Send the coupon below today for the remarkable story of the "535's" and for your Government's authoritative booklet of travel facts. If you are going to travel anywhere on the seas you should have this information.
