Chicago, Aug. 25.—Wheat showed con-siderable strength today after a break of ½ to 10 early. Commission houses were fair buyers and there was some buying against exbuyers and there was some buring against export sales, considerable No. 2 hard having
been worked after the close yesterday. Hedging pressure was moderate as a rule, although
there was some increase in the spring wheat
offerings northwest. Liverpool was 1d off
for futures and unchanged to 3d higher for
spot wheat. Primary receipts were 2,098,000
bushels against 2,283,000 bushels a year ago.
The demoralised German conditions had a
bearish effect early. However, the fact that
the German situation was without effect on
English markets checked selling. Broomhall

lower. Cables were a little better than due, and the market worked up right after the call on a New Orleans crop report, making the condition 57 and the indicated yield 10,800.000 bales. This report stated that the crop was going to pieces in some of the best producing states because of the drouth in Texas or boll weevil and rains in other sections. Today's market was unfavorably influenced by a further collapse in German and French exchange. This caused selling in the early part of the day, which was augmented late in the afternoon by reports of rain in Texas. Prices took a fresh downward turn in the last half hour and closed at the lowest off 20 to 52 points.

Prune Demand Is Light Prame Demand Is Light
Walla Walla, Wash., Aug. 25.—The coal
strike and the railroad strike are blamed by
prune growers in Weila Walla valley for the
alowness in the demand of Eastern and Middle
Western markets for prunes this year. The
growers here claim that the unemployment
caused by the strikes has so greatly reduced
the purchasing power of the people of those
sections that they cannot buy as in pars
previous. Frums are now leaving the Walla

Willamette valley farmers are holding out for higher prices on the 1922 oat crop than millers are willing to pay, and as a result the trade is bringing in oats from the East at a cheaper price to supply the local demand. Local brokers declare that the prices Western farmers are saking will not permit them to do business on a competitive basis with Eastern oats are being laid down here \$4 lower than the demand price of Western farmers, and as a result the trade is looking east for all its supply.
