Beauties of All Races

All get their white teeth in this new-day way

Careful people of some fifty nations now use a new way of teeth cleaning. To millions of women in every clime it is bringing prettier teeth.

Leading dentists, all the world over, are advising its adoption. It means better tooth protection.

Are you still clinging to old methods, when all about you you can see what this new method does?

You must fight film

Old ways of teeth cleaning proved disappointing. Teeth still discolored, still decayed, as most people know. Tooth troubles constantly increased until very few escaped.

Dental science found the reason in a film. In that viscous film you feel. It clings to teeth, enters crevices and stays. Food stains, etc., discolor it. Then it forms dingy coats. Tartar is based on film.

The ordinary tooth paste does not effectively combat it. So the well-brushed teeth of millions were kept clouded more or less by that film.

Film also holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. It forms a breeding place for germs, and they, with tartar, are the chief cause of pyorrhea. Despite the tooth brush, all those troubles became alarming in extent.

Now they combat it

Millions now combat that film. Dental research found two effective ways. One acts to curdle film, one to remove it. This is done daily and gently, without the use of harmful grit.

Able authorities proved these methods by many careful tests. Now leading dentists everywhere advise them.

A new-type tooth paste has been created,

Based on modern research. The name is Pepsodent. Those two great film combatants are now embodied in it for daily application.

A new dental era

Pepsodent brings other effects now found to be essential. Thus it is bringing to countless homes a new dental era.

It multiplies the starch digestant in the saliva. That is there to digest starch deposits which otherwise ferment and form acids.

It multiplies the alkalinity of the saliva. That is Nature's neutralizer for the acids which cause decay. The former tooth pastes, which proved so ineffective, brought just opposite effects.

It polishes the teeth so film less easily adheres.

Thus Pepsodent combines the best that modern science offers to fight enemies of teeth.

Let Children Try It

Do not let your children suffer what you may have suffered from your teeth. Teach them this new-day method. Dentists advise that children use Pepsodent from the time the first tooth appears.

Watch the results on their teeth for a week and you'll realize why they need it.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

Then decide what is best for you and yours by what you see and feel. Cut out the coupon so you won't forget.
