Paddy Gives Prickly Porky a Bath water looked cold. It was cold, Prickly Porky didn't feel like a cold bath. It was cold off rag. —Paddy the Beaver.

PADDY the Beaver and Mrs. Paddy worked as fast and hard as they could, towing or pushing logs and branches from the upper end of their pond down to the new dam. Every time they got down there they looked eagerly to the place where they must drag their logs across the dam to get them in the Laughing Brook below...

What they saw was Prickly Porky the Porcupine, he who carries the thousand little spears hidden in his coat, sitting exactly where they wanted to cross and contentedly gnawing bark from a stick. It began to look as if he intended to spend the rest of the night there. Prickly Porky was in no hurry. For that matter he never is. He knew that Paddy the Beaver wanted him to move, and for that very reason he didn't want to move. He is just as obstinate and pig-headed as that.

After while he finished the bark on that stick. It wasn't a very big stick and his coat was half filled. He wanted more bark. He wanted more bark. Down below him in the water were floating logs and branches which Paddy the Beaver had brought down and left there to drag over the dam when he should get out of the way. As he looked down at them a spark of an idea came into Paddy's dull, little eyes. There was bark he wanted. If he could drag one of those branches or logs up on the dam he would be enabled to keep him busy for the rest of the night. So Prickly Porky crept up to the edge of the water and tried to reach one of those logs or branches with his mouth. "Oh, well, it doesn't matter," said he to himself. "I've got all the time I want. If I wait long enough one of those logs or branches will float within reach." So Prickly Porky settled himself to wait. Now, he could have gone into the water and pulled one of those logs out just as well as not. For Prickly Porky can swim. In fact in summer time he often goes in the water. But he wasn't in the summer. It was the coldest of winter and the

Property Rights Explained to Women

By Vella Wisner

THEAT the women of Oregon have lit the knowledge of women's property rights as set forth by the laws of Oregon was evidenced at the meeting of the Portland Federation of Women's organizations, when Judge W. N. Gaten discussed the topic and afterwards answered the flood of questions that poured in.

Miss Jessie McGregor, chairman of the board of trustees of the scholarship loan of the state federation, spoke of the needs of this fund, saying that it had been necessary to hold up the applications of many deserving young women on account of lack of funds. She urged all clubs affiliated with the state federation to make early and generous contributions to the fund.

Off the dam into the water with a great splash fell Prickly Porky was much more comfortable to be patient and wait.

At last a long branch floated within reach. Prickly Porky got hold of the end of it and began to drag it up on the dam. It was just then that Paddy the Beaver arrived with another log. Prickly Porky was in a great dilemma. He was doing and he guessed right away why he was doing it. "If he gets that stick," thought Paddy, "it will take him the rest of the night to get it out of the way. That will mean that he will stay right there." Paddy shot forward and seized the end of that stick. Then he pulled with all his might. Prickly Porky clamped his teeth on the other end of that stick and prepared to pull, but before he could get himself braced—Paddy knew, he is very slow—Paddy gave a tremendous yank. Prickly Porky held on, lost his footing, off the dam into the water with a great splash fell Prickly Porky! That water was as cold as it looked. Prickly Porky let go of that stick and began to swim. He no longer thought about his stomach. The one thing he thought about was getting out of the water.

Crocker immediately assumed direction of the institution and for several days the president, professors and students took their orders from him. By his good judgment, administrative writes, trouble with the Turks was often averted and the institution saved from destruction.
