

PORT OF PORTLAND EQUIPPED TO HANDLE WORLD COMMERCE BROUGHT BY 43 REGULAR SHIP LINES

MODERN terminals win Portland commerce leadership. 1—Motorized equipment on docks speeds cargoing of ocean liners. 2—Japanese freighter leaving Port of Portland for home loaded down to 30 feet. 3—Oregon apples on their way to Europe in refrigerator ship. 4—Oregon leads Pacific coast in grain exportation and Portland in grain handling equipment. 5—Portland is first American port in lumber exportation; timbers swung direct from cars to ship. 6—Airplane view of port drydocks and machine shops. 7—A scene in inner harbor. 8—Apples waiting exportation. 9—Scores of big motor trucks daily bring prunes and other preserved fruits from Willamette valley to export terminals. 10—Loading wool for export. Portland is largest primary wool shipping port in the United States. 11—Ships taking on food and materials for world use at Terminal No. 4. 12—Shipping structural steel to Orient. 13—A general view of Terminal No. 4 with 1,000,000 bushel bulk elevator in background.
