From Society to Socialism. Speaking of ministers reminds me of a little story I heard recently. Hugh O. Pentecost, who started out as a Baptist preacher, broke away from his church, ran for mayor of Newark, N. J., and is now editor of Twentieth Century. He married a very prominent society girl of Hartford, Conn., about ten years ago. Their wedding was a very swell affair. Afterward Mr. Pentecost accepted a pulpit in Brooklyn at a salary of \$10,000 a year. Everything seemed bright for the and popular, the preacher was eloquent. earnest and successful.

some old friends of Mrs. Pentecost, who had known her in the days when she shone as a society belle, went to hear her husband address a crowd of workingmen on the east side. Imagine their astonishment when Mrs. Pentecost came out on the stage and, attired in a most striking garb, sang to the assemblage a revolutionary song. She has been a most loyal wife. She has supported her husband in every step he has taken, and has been of great service to him in his rather peculiar career. Considering her former life as a society woman, her present career as a singer of socialistic songs is picturesque.—New York Cor. Kansas City Journal.

Mrs. N. E. Bragg, president of the Ladies' Auxiliary, recently laid the cornerstone of the new Y. M. C. A. building at Bangor, Me. PEANUT CRAFTINESS.

AN ITALIAN PEDDLER WHO UNDER-STANDS HUMAN NATURE.

Others "Maka de Appetite" and He "Maka de Mon"-How a Shrewd Vender Takes Advantage of the Wind and His Companions' Ignorance.

A newspaper man who is fond of hot roasted peanuts, and generally pur-chases a pint of them daily from some street vender in Park row, noticed on one occasion that a particularly swarthy old Italian gave him better measure for his money and also larger and more per fect nuts than any other. Accordingly, being a thrifty man, even in small things, he resolved to deal with this fellow exclusively if possible.

The next day, however, as he descended the stairway of the elevated railway he missed the vender at his accustomed stand, and so purchased a pint of pea nuts, which subsequently turned out to be a rather wormy lot, from another son of Italy. He had not got half way to Broadway when he came across the generous vender selling his wares as usual, but in a different place from the one he occupied the day before.

The newspaper man did not want two pints of peanuts, and in fact he had not then discovered the wormy condition of a mental note of the new stand of his

DODGING AROUND.

The next time he had occasion to go through Park row he entered it from Broadway. He looked about for his peanut vender, expecting to find him at the new stand, but he was not. "His honesty has bankrupted him," soliloquized the newspaper man. "It evidently pays better to remain in one spot and sell wormy nuts." So he purchased from another vender and got among his change a plugged Canadian dime, which a horsecar conductor subsequently returned to him with loudly expressed

This thing happened several times. The honest vender always shifted his position and his would-be customer always bought his nuts elsewhere. Finally it flashed into the mind of the newspaper man, whose brain was generally so busy with the big questions of the day, that the circumstances just described had hardly been noticed by him at all up to that time, that this honest vender was always in Park row, somewhere between the elevated road and Broadway, so he determined not to buy any nuts till he came up to him, wherever his chosen stand for the day might

Accordingly, the next day he passed several venders before he came to the shifting merchant, but was rewarded by a heaping measure of particularly fine

"Why don't you stay in one place?" asked the newspaper man. "I like to buy your nuts, and I would do so every day if I could find you without so much trouble. I really can't spare the time to keep thinking of you and a trifling pint of nuts all the way from the elevated road to Broadway. If I knew just where you were I need only think of you as I pass your stand, and my mind would do that mechanically without interupting my other thoughts. See?"

"No unnerstando," said the Italian, with a bright smile.

THE SECRET OUT. se not," anid the other. "Why don't you get one stand and stay there like the other fellows?" he shouted, falling into the popular belief that people understand a foreign tongue when it is screamed at them more readily than when it is whispered.

The Italian shrugged his shoulders "Tinka I get reglah customers?" he

asked with a grin.
"Certainly," said the adviser. "Look at me, for instance." "Why you reglah customer of me and not of other fellahs? Lika de good

nut, eh?" and he showed his white teeth from ear to ear. "Well, that's so," replied the news-paper man with a laugh. "Td deal with you anyway, and you've found that out. I suppose you'll begin to treat me less generously by degrees, now that you think you've got me. But what makes

you shift about so anyway? The others don't do it." "The wind," said the peddler, and then he looked as if he had admitted too much, and would say no more. But the newspaper man's curiosity was aroused, and after dealing with the man for a week or two he won his confidence, and finally learned what the wind had to do

with it.

"Well," said the Italian, still grinning, "I tell you. People dat lika de good nut reglah follow me; people dat lika nut once in while I follow dem. More of dose don de odder. Today wind blow from dat Dago vender up de street, who always stand in one place, to me, who shift about. Man come along very bely and pass his stand. Just as he go by he get strong smell of roasta peanut. He tink he like some, but no time to go back. 'Plenty other fellahs,' he say. Den he come to me and buy some. To-morra, praps, wind blowa de odder way. I go odder side of Dago dat always stand in one place, and I catcha de customahs dat he cause wanta de nut. He

Japanese Lacquer.

The Japanese lacquer which attracts so much attention here on trays and ornaments imported from that mysterious land has an interesting history. It is extracted from a tree, like sugar from a maple, and these lacquer yielding trees reach a very large size. They only live about forty years, when they are cut down, and the lacquer extracted from the branches, and young trees take their place. The varnish is proof against boil-ing water, alcohol and almost every agent known, while it takes a polish which is practically indestructible. It can be used for the most diverse purposes.—New York Telegram.
