THEY WANT THE BLOOD.

The San Francisco Highbinders After a Contractor.

SAN FRANCISCO, March 13 .- Seid Back, a member of the firm of Sing Wing & Co. of Portland, Oregon, is being guarded by the police from a gang of highbinders. Back is a contractor and at the begintown. He came however, armed with letters of introduction from Portland's best citizens, and applied to Chief Crowbest citizens ci ley for police protection and filed answer of God's wrath, and a warning to all who to the suit. Back said he owed one man \$23 and the jury returned a verdict against him for that amount, but ordered plaintiffs to pay costs. The highbinders declare they will have Back's life, but he says if police will see him safe aboard the steamer he will get home all right.

A Huge Levee Breaks.

Мемриів, March 13.—A stream of water 175 feet wide is now flowing through the new Robinson levee which gave away yesterday. It is stated that the levee was cut or blown up. It is said that thirty or forty laborers on the contract were discharged without their pay, recently and it is surmised that some of these men exploded a dynamite cartridge where it would do the damage. The damage will not be heavy.

New HAVEN, March 11.—The French Roman Catholics in this city are horrified at what they consider the punishrecently from Montreal, and revival services followed his advent to this city. At one of these meetings the priest urged his hearers to endeavor to reclaim all whom they had known as members of the church, but who had become in-different to religion. With this end in view the congregation called upon many of their own nationality, and special efforts were made to reclaim Louis Lemay, of 110 James street. Several selfmay, of 110 James street. Several self-constituted missionaries sought Lemay at his rooms yesterday, and with prayers and supplications besought him to turn from his present ways and find consola-tion within the portals of the church. Moor Baths. The moor baths, of which much is now heard, and which are provided at many Austrian and German health resorts, were first used at Franzensbad. In 1823 Dr. Poschmann, a physician there, believed that he had found in them a new curative medium, and they have since become popular. Some physicians still question their efficacy, while others in Austria and Germany rely upon their to render good service in many maladies. Though the bath is composed of peat or moor earth to which enough water has been added to make a thick paste of the mass, yet the peat is different from that

or Scotland. In both Ireland and Scotland the pest is used as fuel; at Franzensbad the mineralized peat will not serve such a purpose. The bog from which it is extract, ed has been saturated throughout countless ages with mineral water, and the product is a strong chemical compound. Thus a moor bath is a mineral bath in a concentrated form, and effects are produced upon the system by taking a course of these baths which cannot be produced, according to experts, by any mineral water.—Blackwood's Magazine.

Umbrellas in England. dil prot How many umbrellas are manufactured in this country annually? There are no official returns giving the number in this country, though in the United States it is calculated that one umbrella is made annually for every six persons, If we apply this proportion to the population of the United Kingdom-now calculated, in round numbers, at 38,000,000 -over 6,000,000 umbrellas are made annually. Upward of 2,500,000 umbrellas were imported by sea into Calcutta in the year 1888-89, and the yearly exports of umbrellas from this country are valued at £581,000. In France, in 1830, umbrellas were manufactured by 160 makers to the value of £280,000; in 1847, £405,000 worth by 303 makers; in 1882 their value was £1,180,000, and 890 manufacturers. Price averaged four francs each. There were thus made in France in 1882 7,500,

000 umbrellas, or nearly one for each in-habited house.—London Tit-Bits. How Old Spiders Live.

Old spiders, which have neither web nor the materials to make one, often hunt about to find out the webs of other spiders, younger and weaker than themselves, with whom they venture battle. The invader generally succeeds, and the younger spider is driven out to make a new web, and the old spider remains in possession until a stronger spider invades the web and drives it out. When thus dispossessed the spider seldom ven-tures another attack, but tries to subsist upon the few insects that may fall accidentally into its clutches, and eventually
