THE PANAMA CANAL.

A Report Submitted, Which Was Prepared to Conceal the Helplessness of the Enterprise.

Paris, April 19.—The report on the Panama canal has been sent to the liquidator of the company, Monchicourt, by Lieutenant Wyse, who has been ne-gotiating with the Columbian govern-ment to prolong the concession. The report is a voluminous document. It was, apparently, prepared with the object of concealing, amid an endless maze of words and reiterated expressions about the sanguine prospects the actual hope-lessness of any further enterprise in that direction. After detailing the negotiations, Lieutenaut Wyse concluded:

"If my success with Colombia is not to remain barren the hour has come for us to make a resolution to take immedihall, where the convention is to be held ate and energetic action to save the bunting.

Chief Engineer Wasber was among those caught, and although bruised and burned, he did not relinquish his command. Chief Reagan was also buried, but his injuries are not serious. Captain Willet was injured about the shoulders. Captain Griffin was pinned down by heavy timbers, which were sawed apart before he could be released. District engineer Creswell was pinned down nearly an hour. His leg was crushed by heavy timbers. The injuries of all, though painful, are not fatal. A dozen other firemen were injured, some seriously.

The English Now Think America in the

Right. London, April 19.—Blaine's dispatch, pletely tied up this morning and others are running under police protection as the result of the strike of 150 conductors and drivers. It is not known what the reason for the strike is.

Poor Kansas.

London, April 19.—Blaine's dispatch, dated April 14, to Marquis Imperiali, as cabled in full, elicits the enconiums it deserves. It is the merest justice to Mr. Blaine to say that he has turned the current of English opinion, which at one moment ran strongly against America. The Standard, which at first was all on the side of Italy, has come around and practically accepts Blaine's views with perhaps one exception. His contention, which was also Webster's, that foreign residents cannot be made a that foreign residents cannot be made at more favored class than American citizens, appeals strongly to English minds. The Times has from the beginning been the friend of America in this matter. It has taken a sound, sensible view both of the New Orleans incident itself and of the question arising out of it.

able to be present. The distinguished visitors were escorted to the court house where a formal address was made. When the procession reached the nearest point to the Mexican line the artillery of that country fired a salute in honor of President Harrison.

Burned to Death.

PORTLAND, April 21.-Helen Christian a domestic, employed at the residence of Joseph Holder, in Sunnyside, met with a terrible accident last night which will doubtless prove fatal. She was engaged in ironing clothes and accidentally upset a lighted lamp which exploded setting fire to her clothes and completely enveloping her in flames. Before the flames could be smothered her clothing was entirely consumed and her flesh was fearfully burned.

She Must Have Been Insane.

New York, April 19.—Mrs. Franch Conrad, aged 59, committed suicide at her home in Hoboken, N. J., this mornner nome in Hodoken, N. J., this morning by hanging. She hacked herself with a pair of shears at first, severing an artery in her leg and the arteries of both her wrists, as well as gashing her throat. She then hanged herself with a picture cord. How Mark Twain Seems. The opinions of our serving folks are sometimes worth knowing. At the Murray Hill hotel the other day one of the porters remarked: "There goes the solemnest and dismalest gent as ever stopped at this 'ouse. I don't b'lieve he

New York World. Discovery of Mahogany

In the year 1597 one of Sir Walter Raleigh's ships, in an expedition against the Azores, put in at Trinidad for repairs. The workmen used the first wood that came to hand, and it happened to be the now famous mahogany. By this accident it was first introduced into England, where it was much admired, but it did not become an article of commerce until a century later. Since then it has held first rank as a cabinet maker's wood .-Golden Days.

How Playing Marbles Are Made. Nearly all the common marbles which drag down the pockets of our boys are made in Oberstein, Germany. They are made from the refuse of the agate and stone quarries in that neighborhood. The stone is broken into small cubes by blows of a light hammer. These small blocks of stone are thrown by the shovelful into the "hopper" of a small mill, formed of a bed of stone, having its surface grooved with concentrated furrows; above these is the "runner," which is made of hard wood having a level face on its lower surface. The upper block is made to revolve rapidly, water being delivered upon the grooves of the bed stone where the marbles are being rounded. It takes about fifteen minutes to finish a bushel of good marbles ready for "snapping." One mill will turn out 170,000 marbles per week. The very hardest "crackers," as the boys ca'l them, are made by a slower process, somewhat analogous, however, to the other.—New York Telegram.
