Noble's Decision.

Stripped of its verbiage and reduced to simple language the decision of Secretary Noble in cases of contests on homestead entries amounts to this: First—In all cases arising hereafter contests must be filed within two years after the receiver's receipt had been given on final entry, or they will not be recognized and a patent will issue as if no contest had been instituted.

Second—The law has a retroactive effect also to this extent—suppose the receiver's receipt bears date May 1, 1889, and no contest is filed before the 1st of May, 1891; in such case the two years count and no contest will therefore be recognized, although part of the limited period is thus made effective before the passage of the late law.

A letter from a large steamship firm in England indicates the probability of increased shipping business and higher grain rates from the United States ports this summer. The writer says it is evident that between now and next harvest a large quantity of grain must come from America to supply the deficiency in France, which is stated to be about 10,000,000 or 11,000,000 quarters, and Belgium will also have a large deficiency. All good ships will meet with good employment during the summer, not at excessively high rates, but at something better than present ones.—Astorian.
