The first plan is to acquaint the czar with the truth regarding the cruelties perpetrated in his name. Gold Shipments Likely to Continue. NEW YORK, May 26.—The member of a house shipping gold said: "Europe is still calling for gold, but our agents don't say why. They don't seem to know. Our advice seems to indicate a very bad condition of affairs in Europe. Every man, woman and child on the continent has been speculating and lost, and the countries are suffering for it now. Italy is in distress and buying breadstuffs abroad, Austria is importing breadstuffs, Germany is overcrowded and arming herself, while the people are getting poorer every day, and Russia is rotten, politically and socially. There is no telling when the drain of gold from here will be over."

Accidental Education. Growth often takes place in unexpected ways, or does not take place when we should expect it. The order of development is less rigid and more variable than sometimes supposed. If it were not the case there would be more difference than there is at present between a child educated in a kindergarten and one educated in a well ordered home. In the home the objects present themselves to the child without any fixed order—he tumbles into knowledge, and this want of system is not without its advantages, seeing that we cannot make our systems perfect.
