Dr. Shipman of Christ church, Rev. Mr. Butler, of the church of the Epiphany and Rev. Dr. Peters, of Old St. Michael's, Bloomdale. Spraying for San Jose Scale. The following was given to the Cali-Exporter

W. J. Dobbins, one of the largest growers of prunes in Vaca valley:
"Do you know that it is no trick to kill the San Jose scale? No? Well, itisn't. If growers will spray thoroughly with lime, salt and sulphur the scale is easily killed. I will tell you my formula. I take twenty pounds of sulphur, ten pounds of lime and thirty gallons of water, cook and constantly stir until it takes on a dark red color. I then dis-solve or slake fifteen pounds of salt and forty pounds of lime in thirty gallons of cold water. When I get ready to spray I use twenty five gallons of the cooked lime and sulphur, fifty gallons of the slacked lime and salt and twenty-five gallons of hot water. When in the spray-box this mixture should be continually stirred while spraying. It won't do to allow the ingredients to settle. I have a man on the box to do nothing else but stir and drive. Trees should not be sprayed with this mixture in the spring or summer, because serious results will follow. It should be applied the foreign secretary, and the usual suite; but nobody of distinction. While eradicate all traces of the San Jose scale."

> A Portland paper has the following paragraph: "The Dalles CHRONICLE says that George Knaggs is really going to be a candidate for city recorder." Really going to be a candidate! What can it mean? Does the paper suppose George is a fossil, or a millionaire, or a parson, or a sardine, or a bloated bondholder, or an Egyptian mummy? Does it suppose that the weight of some eight score years has any more effect on the vital energies of George Knaggs than a fly has on the back of an elephant? In spite of Barney Goldsmith's lecture on Knaggs the people of Portland have much to learn about him.
