The Chronicle is the Only Paper in The Dalles that Receives the Associated Press Dispatches.

fruits do remarkably well. Fruit trees, hearts in Christian love." where they have been planted any reasonable length of time are, this year, their thanks to the people of The Dalles loaded down with fruit. The country is setting up rapidly with an excellent class of emigrants, and for a summer residuely for the Christian hospitality to the ministers during this meeting. dence there are few more desirable places in the world, while the winters are very little colder than many other parts of this county. Mr. Cooper informs us that there is still room for many more families whom the present settler would gladly welcome.

Timothy Brown of Dufur has a great curiosity in the shape of a petrified ham of bacon, which he found, many years ago, in the Des Moines river, Iowa. The shape of the ham is perfect in every detail, except that where the large bone ought to be there is a hole extending into the interior of the ham about eight inches. In size, it is that of a ham that would weigh from twelve to fourteen pounds, but its actual weight cannot be much less than thirty pounds. Mr. Brown has refused \$50 for the curiosity. He has also a rare collection of Indian relics, among which are two or three very perfect stone axes, querns, pestles and a crudely made metal tomahawk.

It may be a surprise to many to learn that fruit raising on Tygh Ridge is no longer an experiment. Mr. Thorburn has apple and pear trees that have not failed of a crop for ten years, while his peach trees have yielded, on an average, a good crop every second year. No finer apples are grown anywhere. The writer lest Spinday are some of Mr. Thornburn's academy has been established near the last Sunday ate some of Mr. Thornburn's last year's apples that were as sound as seminary for the preparation of young men the day they were plucked off the tree. This year his ingenuity is put to the test to devise ways to keep the trees from breaking down under their load of fruit.

L. J. Klinger, of Dufur, intends after the Fourth to visit the Warm Spring of an undertaking. In order that ocean reservation and remain there, fishing, vessels may reach the French capital it is hunting, and bathing for a couple of weeks, after which he intends spending and to cut canals at the chords of two a month hunting and berrying in the neighborhood of Mount Hood. Mr. Klinger combines business with pleasure in a manner that very few can equal. He owns a bear dog that he says has made a solemn contract with him for the delivery of lifty bear hides, during the season.

G. J. McCoy, the industrial teacher at Sinemasho, Warm Spring reservation, gave this office a pleasant call Tuesday. He informs us that the crickets which have done a great deal of injury to crops on the reservation have now disappeared, and late rains have started the grain which they cut down, to a fresh growth, so that much of it will at least make hav. No injury was done to crops on the northern part of the reservation.

The M. E. society of Dufur have built a new church that is a model of neatness, and good taste. The lecture room is twenty-eight by fifty feet and has a seating capacity of between 200 and 300. It is surmounted by a neat tower that rises to a height of sixty-eight feet. The painter is just giving the building its finishing touches, and the cost when complete will cost in the neighborhood of \$1600.

The Washington Independent paid the Walla Walla Union-Journal the compliment of having, for the only time in sixteen years, conceded a democrat to be an honest man, whereupon the Union-Journal comes out with the explanation that the Independent took advantage of a typographical error.

The Umatilla Indians will celebrate the Fourth with a grand parade, speaking, a big free dinner, foot racing, wrestling, dancing, and horse racing. The fun will be kept up for several days.

The Advent Conference. The Advent Christian camp-meeting

has closed; it has been in session for two weeks, and the attendance has been good. During the first week while conference was in session the delegates in made the attendance larger than for the last week. These meetings were seasons of especial enjoyment and strength to the Christians in attendance. Ten ministers were in attendance a part of the time. Seven were hantised design to the control of the time. Seven were hantised design to the control of the time. attendance from churches at a distance valued at \$5.

This institution was started fifteen years ago by the late Dr. W. A Scott. Alexander Montgomery recently gave \$250,-000 toward the erection of the buildings, which include Montgomery hall, now in process of construction, and Presbyterian

tributious. Mr. Ladd, of Portland, Or. in preliminary education. "The constituency of the seminary," says Dr. Mackenzie "represents the people on the Pacific coast from the Canadian boundary to San Diego."

The Plan to Make Paris a Seaport. The proposal to make Paris practically a scaport is about to assume the actual form planned to deepen the channel of the Seine great bends of the Seine, reducing the dis-tance between Rouen and Paris to 112 miles. The Paris port would be somewhere between St. Denis and Clichy, while five intermediate ports would be made from Rouen to the capital. At present the cost is estimated at \$30,000,000.

Tea Drinking.

The custom of tea drinking is as old as the Chinese empire, and as early as 780 A. D. a duty was levied on the tea that grew wild on the Chinese mountains. But it is within two centuries that its use was adopted by the English, when the East Tea company imported it and it was sold at \$25 a pound. Its use was confined to the royal household. In the reign of Henry VII a refreshment consisting of tea and cakes was called a

On the occasion of the marriage dinner of Katharine of Arragon and Arthur, prince of Wales, the court chronicler wrote: "The evening refreshment called voide was brought in by fourscore earls, barons and knights, walking two and two. Ipocras and comfits were offered: One noble servitor presented the golden spice plate, a second the cups, while a third of lower rank filled the cups from

A Horld Sample. nercial traveler whom I know carries perhaps the most unique "sam-ple" in the drumming profession. It is nothing less than a human body, three years old, an example of the efficacy of a certain embalming fluid. For three years this mummy has been transported on the railroads as a sample case would be, and, indeed, there is no outward sign which would indicate the uncanny nature of its contents. In this instance the longer the body is preserved the more of an advertisement it is for the fluid in the veins of the "stiff." The box is zinc lined, and does not exceed the limits of the railroad excess baggage rule in weight. | Fourth of July Contests
