CAPTAIN MAZEN'S STORY.

His Account of the Itata's Trip North After Arms.

SAN DIEGO, July 6.—Captain Mazen, of the Itata, said with reference to his expedition, taken in behalf of the insurgents, that April 7th he left Iquique for Arica, and only after he left there the next morning was he informed that the point of destination was San Diego.

"As I had no knowledge of any intention to receive arms, I desired to protest and if necessary produce my German papers, but in unforeseen circumstances altered my course of action, and my parole with Marshal Gard having expired, I saw myself obliged to leave a friendly port without papers.

"On my return trip, not having the course of the Esmeralda to guide me, as I had for a portion of the way up, I found myself on the boundless ocean without a chart or chronometer. Not knowing my destination when starting and not being a war vessel, I had nothing of the kind, and sailed from San Clemente Island steering my course by sextant and log to Picoorin, 5600 miles.

When I first sighted land that long voyage I was just thirteen miles from that harbor."

RELYING ON THIS COUNTRY.

Liberia agitated Over the Encroachments of European Powers.

NEW YORK, July 6.—The republic of Liberia is now agitated over the encroachments of the European powers, and is anxiously watching every step made in the partition of Africa.

"These are trying times for Liberia, and its people are calling for the moral support of the United States. There is much excitement over the encroachments of French at Cape Palmas. They have crossed from Ashantee into Liberian territory, established military stations and refused to go away.

"The country is prosperous and is making headway in civilization and wealth, but the constant fear that the republic will be swallowed up by some European power greatly checks its progress. What the black republic wants now is for the United States to present it with one of its old wooden war ships. It wants this for the effect that such an act would have. At present Liberia is absolutely powerless against any one of the great powers, and the destiny and salvation of the republic lies with the United States."

Blair's Salary.

WASHINGTON, July 6.—Acting Secretary of State Wharton today declined to talk about the formal refusal of the Chinese government to receive ex-Senator Blair as United States minister to that country.

He said, however, that he would like to have it known that Mr. Blair has drawn but one month's salary, which the law allows, since his appointment, and that he is not, as erroneously reported, drawing a salary now as minister to China.

Weeds and Bugs on the Farm.

I suppose no problem is just now so important as which shall come out ahead in the struggle for existence—man or the insects and weeds. We have little to fear from large animals, for man has invented weapons for destroying them.

But their decrease has disturbed the equilibrium in other directions. There are fewer creatures to devour wild weeds, and more seed is ripened and drifted over the globe.

It is by no means yet proven that we shall be able to make agriculture pay while we are contending with such a host of the enemy as wild carrot, Canada thistle, plantains, docks and daisies, with their allies. But the contest is just as severe and just as doubtful with the bugs. The wisest feature of our civilization is the incorporation into government of the scientific study of insects and weeds.

Entomology and botany must very soon become the leading studies of our common schools. Children who are to live on the land and become producers must know what to do to hold their own.—Mary E. Spencer in St. Louis Globe-Democrat.

How Dogs Make Their Toilet.

Spouting dogs, which are used in mud, snow and wet, are strangely clever and quick in cleaning and drying their coats, and it is a sure sign that a dog has been overtired if he shows any trace of mud or dirt next morning.

Most of their toilet is done with the tongue, but they are very clever at using a bush or the side of a haystack as a rough towel. One small spaniel which was allowed to live in the house was well aware that if he returned dirty he would not be admitted indoors.

After an hour before the close of the day's shooting he used to strike water and begin to clean himself, and if urged to do more would slip off home and present himself neat and clean in the dining room.

One day the dog had been left at home, and his master returned and seated himself, wet and with half frozen drops of ice sticking to his gaiters, by the fire. Pan ran up and carefully licked off the frozen ice and snow, stopping every now and then to give an anxious look, which said as plainly as possible:

"Dear me! If I don't get him clean quickly he will be sent to lie in the stable."
