The Dalles Daily Chronicle. They Bing Yesterday for R. R. Moore and his Charming Brides.

The handsome rooms of Mr. and Mrs. Will S. Graham in the Vogt block, were filled at 3 o'clock yesterday by a select party of friends to witness the marriage of one of our popular railroad conductors, Mr. R. B. Moore to Miss Lulu B. Graham. Under a beautiful floral horse shoe, Mr. Mm. Michell performed the ceremony which made two loving hearts one, and started them out on life's journey which their friends hope will be a prosperous and happy one. The bride was radiant in pale blue surah silk with Weather forecast till 12 m., cream trimmings, the pleating being very Friday; fair. Nearly sta- fine and tasteful. THE WHEAT OUTLOOK.

The United States Will Raise 555,000'. 000 Bushels This Year.

Much is said and written on the wheat outlook for 1891. The product of the United States is estimated at 555,000,000 bushels for this year, which is above the average about 70,000,000. This estimate is based on reports from state crop bureaus, and is not authentic enough to be put down as reliable, but enough is United States, there is a shyness about publishing anything that will give semblance to the agricultural classes that will indicate higher prices for the year's product.

Reports have been received recently, by the state department at Washington. D. C., from the commercial agent of the Millers' Association in France, which gives some valuable information on the wheat question-although it may be somewhat premature, as the harvest is not entirely over in the main, enough may be gathered to base estimates on. France's average product is put down at 368,560,000 bushels, and her annual conton-made mens' and boys' fine boots sumption, to 306,000,000, bushels. She and shoes in all styles, carried by The estimates her yield at 234,540,500 bushels. for this year, and including 42,500,000 bushels used for such, shows a deficiency of 103,959,500 bushels.

In Russia, Tunis, Egypt, Roumania, kitchen and dining-room, for 75 cents a and some of the Danubian provinces, their crops are reported fairly good, but in Hungary it will fall below the average. Their millers' reports are optimistic, as they desire to create the impression that the supply is sufficient throughout the province. The report to the state dedepartment concludes with the assertion that not only France but all Europe must look and depend on North America alone to supply the deficiency, as South America has no surplus owing to their internal disturbances.

1. was so little satisfied with the results of my investment that I chose the third, cash, proposition, but when I so decided, the company, through several of its representatives, labored to induce me to take one of the other forms of settlement, but finding that I was determined to surrender the policy and take the cash, they finally instructed me from the home office to send policy and receipt for the amount, \$75,496.50, to their State managerin Cleveland, and he would remit me the amount I followed their instructions and sent the policy and receipt through my bank in Springfield to our correspondent in Cleveland, only to have it returned from the Cleveland Bank with the information that the State manager of the Equitable states that he "had not sufficient funds to meet it." This forced me to return it to the New York office, and compelled me to wait some twenty days after maturity before receiving final settlement.

I have given no statement endorsing the Equitable, or expressing my satisfaction with their settlement with me. On the other hand I have positively refused to do so. The fact that my returns were \$1,010.29 less than my total investment renders further comment unnecessary.

During the time I carried the Equitable policy and up to the day when they submitted the above proposition to me. I was kept in total ignorance of the condition of my investment.

In marked contrast with this has been my experience with the Northwestern, in which in 1882, I took a Ten-Year Endowment Policy, Ten-Year Tontine, for \$10,000, that company having from time to time furnished me with a memorandum of the surplus on my policy over the signature of their actuary; so that while my policy has not yet matured, and will not until next year, I have the satisfaction of knowing that at maturity it will net me from \$4.000 to \$5,000 more than the face of the policy calls for.

Very truly yours.
