The Chronicle is the Daily Paper in the Dalles, and we have subscribed to the Associated Press.

**SUPPORT THE NEW BOATS.**

A day's more and the relief that the people of this section have been are in a considerable degree accomplished. Things will be better in the near future, and a reduced rate that will put thousands of dollars in the pockets of producers and merchants alike. The man who has paid that rate has been enabled to do the things that he would have done during the time, and has thereby been benefited. The animal, he lacks the concomitant of the trade. But that this is not the case, and that the people who have not been better off, will have been better off than ever before, is the opinion of the people of the Dalles, who are men of business and men of affairs.

*State Men & Surveyor* completed their work during the month, and have selected the line of road that they think will be most beneficial for the people of the district. It is their intention to commence work on the road as soon as possible. They have a large force of men at work, and it is expected that the road will be completed in a short time.

R. J. Bowes, the authority on the telegraphs, said: "The first stage of our progress in the manufacture of the telegraph is completed. The results will be remarkable." He added: "The telegraph is a great improvement, and will be of the greatest benefit to the people of the district."

A correspondent has reported that the Great Salt Lake is about to be drained. The water will be taken for the irrigation of the land, and will be of the greatest benefit to the farmers of the district. The irrigation will be commenced at once, and it is expected that the work will be completed in a short time.

The Dalles, September 11, 1891.
