The Salem grange has resolved that "Whereas, it is shown by national statistics that capital invested in agriculture does not yield more than 3 per cent. therefore resolved, that farmers should not carry on their business on borrowed money at the current rates of interest; that we are opposed to the credit system and the morgage system." If this is intended to discourage the practice of going in debt it is a step in the right direcordinarily a farmer cannot afford to Tribune. work on a capital borrowed at the current rates of interest, but on the other hand tens of thousands of western farmers have done so and succeeded. What one has done another may do and no resolutions passed by any meeting or association will stop men from borrowing money or going in debt when there is a fair prospect of a successful outcome.

The January number of the Forum has turned the light on the business methods of the Louisiana Lottery company and for the first time has explained in brief compass the workings of this shot huge fraud. It appears that the total air. amount of money taken in per annum by the lottery, if all its tickets are sold, is \$28,000,000 and the largest possible amount that can be drawn by the holders of the tickets is \$14,000,000 so that the lottery puts into its own coffers 47 per cent of all the money it receives and like bombs exploding, and after each the sum, in years when there is a good discharge of molten lava and flames the run in the sale of tickets, amounts to \$13,000,000 or more. An Exciting Chase After a Burning Tug. Four men struggled for their lives on a burning tug three miles from shore one morning recently in the gathering dawn. The men were the crew of the tug John A. Miller, suddenly aroused to find the engine house a mass of flames. THE CHRONICLE PUBLISHING CO. Was of no avail. With a full head of steam on the boat was headed for the shore, but the rapid fire drove the wheelsman from the pilot house, and then the blazing and unmanageable tug plowed the choppy waves in a great cir-cle, the flames swiftly eating their way to the stern, where the four men stood helpless against the fury of two ele-ments. They had fought the fire till almost exhausted, their hands and faces were burned, and in despair they glanced in every direction for a sign that help

A mile away east the crew of the tug Welcome saw the flames of the burning boat. The throttle was thrown wide open, and the little boat, with the whistle tooting hope for the imperiled crew, plunged through the heavy sea toward the burning tug. Blazing almost to the water's edge it was running a mad race through the waves. Two brothers of the Welcome's captain were on the burning boat, and, in danger of a collision or of catching fire, the Wel-

come shot after the Miller on its course. It was a thrilling race. Round and round the boats went before the Welcome could touch the Miller. The four men crouched astern. The flames leaped toward them. They were scorching the faces of the men. With a spurt the Welcome crushed into the Miller. Three pairs of arms shot out over the bow and in a moment two of the four exhausted men were on the Welcome and it steered clear of the burning boat. Another spurt and the rescuers managed tion. An Island All Ablaze.

The steamer China has arrived from Hong-Kong and Yokohama. While the steamer was between Hong-Kong and Yokohama on the return trip to San Francisco an imposing sight was wit-

nessed by the passengers and crew.

The great earthquake at Yokohama had taken place a short time previous, and many of the islands in the Yellow sea were in a state of volcanic disturbance. About 7 o'clock on the evening of Nov. 3 the China was passing the Aleutian islands, in Van Dieman's straits, when suddenly the island of Succa seemed all ablaze, and flames and lava shot up to a distance of 800 feet in the

The night was dark and the eruptions from the crater of the volcano took place at intervals of about fifty seconds. They were accompanied by deto-nations which in the distance sounded burning fragments descended like sparks from a gigantic Roman candle.-San Francisco Examiner.

> Girls Will Furnish the Cuticle. Several months ago Ernest Schmitz, of Laporte, Ind., was severely burned with gasoline, and his physician has decided that the only way his injuries can be healed is by skin grafting. As it will require a considerable quantity of epi-dermis, the young ladies of the Laporte Charity circle have consented to furnish the necessary amount of cuticle. Operations will be commenced immediately, providing the young ladies adhere to their agreement. - Cor. Baltimore Ameri-

Two decisions have recently been rendered by important tribunals which rebuke the tendency to interfere with the right of the citizen to be let alone. The supreme court of Mississippi has decid-ed, in the case of a black man whose cabin was entered by a party of men who came to "arrest" him, without warrant of law, for an alleged offense, and who shot and killed two of these invaders of his house, that a man has a right to defend himself under such circum-

The other decision mentioned is in a caseof a very unusual character. A certain society proposed to erect a statue of a deceased and very philanthropic lady The members of this lady's immediate family objected, on the ground that notoriety in any form was wholly distasteful to her, and that, inasmuch as she was a private citizen, the erection of a statue of her was an unauthorized

Killed the Bear with a Penknife. A big yearling bear was killed on Fri-day on Little mountain, near Parkers burg, W. Va., by John Hall, seventeen years old, and Mont Black, twelve years of age. The boys were coon hunting in the mountain when the dogs treed the bear. They had an old single barreled shotgun, loaded with bird shot and an ax. They fired the load of shot into the bear and brought the animal down.

One of the boys ran in and struck at the bear with the ax, but did not hit it. Young Hall then drew his pocketknife and went at the bear. He was pretty badly scratched and severely bitten on the fingers, but stuck to the brute until he cut the bear's jugular vein. The boys dragged home the body in triumph.-Cor. New York Sun.

Curious Marrying Mistake.

At the parish church of Brierly Hill, on the borders of the Black country, a curious mistake occurred a few days ago. A bridal party by some means or cupied their wrong places, and the bride was married to the best man, who was engaged to marry her sister. During the ceremony the bride had some idea that the proceedings were hardly as they should be, as the bridegroom stood be hind her and the best man, and handed the ring to the latter. On the other hand, the best man made the necessary responses. Happily the error was dis covered before the register had been signed and the ceremony was gone through a second time, care being taken that the right man was wedded to the bride.-London Tit-Bits.

A Cricket Bowling Machine.

Recently a patent bowling machine where the unerring aim of the mechanical cricketer knocked out the middle stump of the most expert batsman that stood before it. The length of pitch, direction and movement of the ball can be produced within wide ranges with great facility. Divorced in Fifty-seven Seconds. In the district court at Galveston Friday the suit of Mattie Brooks against her husband, William Brooks, was on the docket for trial. The case was called by Judge Stewart, but the defendant did not appear. The plaintiff's attorney arose, read the petition, alleging the statutory requisitions and setting forth the caus of action, put a witness on the stand and examined him, and secured the sanction of the court to the entree of a decree of divorce, all having been done in exactly fifty-seven seconds.-Exchange.

Mining from a Balloon.

Think of a mining enterprise conducted by soaring aloft in a balloon. There are many ore producing ledges on the precipitous sides of hills in the Rocky mountains. These ledges are so lofty as to be inaccessible by ordinary methods; therefore, Mr. S. C. Rees, an experienced miner, proposes to reach them by means of an anchored balloon. This will enable him to secure footbold on the ledges and make entrances through the sides of the precipitous hills.-Yankee
