### THE BOAT RAILWAY.

The Senate Transportation Committee in Favor of the Bill.

STILL AFTER THE LOTTERY.

The Anti-Lottery Members Will Accept no Compromise.

THE WAYS AND MEANS COMMITTEE.

They are Hard After the McKinley Bill -- In Favor of This Country -- A Tour of Inspection.

WASHINGTON, Feb. 5.—The senate committee on transportation routes to the seaboard today unanimously recommended the passage of Senator Mitchell's bill appropriating \$2,800,350, the estimate of the war department, for the completion of a boat railway at The Dalles. Senator Mitchell was authorized to prepare and present to the senate a report in conformity with the actions of the committee. He will present it Monday.

The Anti-Lottery Members Will Accept no Compromise.

NEW ORLEANS, Feb. 4.—The *New Delta*, the organ of the anti-lottery party, will tomorrow contain an interview with the chairman of the anti-lottery democratic executive committee, to the effect that Morris' withdrawal of his lottery proposition will not make the slightest change in the programme of their party. He adds, the proposition heretofore made by the lottery is no longer acceptable to its advocates, by reason of curtailing its revenue through the decision of the supreme court, but should the attempt to capture the state not succeed, they may yet strive to call a constitutional convention, under the pretext of regulating suffrage, and obtain another grant for a lottery in the new constitution on terms more favorable than the amendment now pending, or adopt other means of achieving their object. "All former experiences with the lottery," says the chairman, "have taught us it is fertile in schemes to effect its purposes. We intend to see the amendment voted down in April by such a majority as to preclude all possibility of further agitation on the question, and that none but anti-lottery men be placed on guard until all the lotteries have ceased to maintain a legal existence in the state of Louisiana."

The Ways and Means Committee to Meet Today.

WASHINGTON, Feb. 4.—When the ways and means committee meets tomorrow it will probably formally agree to make a favorable report on the free wool bill, and the majority will grant the opposition members a week in which to prepare a minority report. Both reports will be submitted to the house. The democratic members of the committee have interviewed those members of the majority who are opposed to the separate bill plan, and have indicated their purpose to aid their colleagues, with the understanding that the committee will report bills attacking every prominent feature of the McKinley bill. Some members of the majority are contending that the revenues will not stand a reduction, and this is met with the claim that bills can be introduced to meet all the requirements of the case, and that if a complete revision of the schedule is necessary to prevent a shortage of revenues, resulting from placing raw materials on the free list, a general bill would be proposed. It is believed that not less than six tariff bills will be reported from the committee.

A Difference in Favor of This Country.

WASHINGTON, Feb. 4.—The reduced duty on American flour imported to Cuba, under the reciprocity treaty, went into effect January 1st last. Consul-General Williams telegraphs the state department that the receipts of flour at the port of Havana for the month of January last was as follows: From the United States, 62,371 sacks; from Spain, none. The receipts for the month of January 1891, were: From the United States, 2,720 sacks; from Spain, 38,490 bags. The exports of flour to Cuba from the ports of New York, New Orleans, Mobile and Key West in January 1892, amounted to 67,478 barrels, or sacks. The exports from the same ports in January, 1891, were 9,234 barrels.

An Official Tour of Inspection.

WASHINGTON, Feb. 4.—Several persons

representing the French government are now on their way to Chicago and other Western points for the purpose of investigating our pork inspection regulations and the efficiency of their practical application. The party includes M. Riche, member of the Academy of Medicine and professor of chemistry in the Paris College of Pharmacy; E. Roume, an official of the foreign department of the ministry of commerce, and Maurice Duclose, a produce commission merchant, especially commissioned by the minister of agriculture for this investigation. The party was furnished by Secretary Rusk with a letter of introduction to the chief inspector of the department in Chicago.

Debate on the Option Bill in the Senate.

WASHINGTON, Feb. 4.—The senate confirmed the following nominations: James S. Beaty, United States district judge for Idaho; D. P. Robert, of Indiana, recorder of the general land office; L. S. Howlett, register of the land office at North Yakima, Wash.

The opponents of the option bill had the floor today on a hearing before the house committee on agriculture. Chicago and Minneapolis told why the bill would not benefit farmers and would hurt men engaged in the business of supplying the demand for grain. Aldrich, of the Chicago board of trade, said the board was heartily in favor of the bill, so far as it related to options as designated in the first section of the measure relating to fictitious sales. That kind of trading, had always been illegal and never recognized. The board had spent a great deal of money trying to procure the enforcement of a law prohibiting gambling in contracts. The system in operation is the result of a great many years of experience. It is not something devised especially to give an opportunity for dealing in futures. The boards of trade, like bank clearing-houses, were commercial conveniences for exchange. The declines which came as a rule were legitimate and due to the supply exceeding the demand for the crop. At times prices were temporarily advanced by speculative buying, and, in short, fluctuations were greater on that side than the other. Continuing, Aldrich said that if the bill under consideration was passed it would be the most disastrous thing for farmers that could happen, and would deprive them of their system of exchange. Aldrich said it would not be an over estimate to say that \$5,000,000 dollars was put into Chicago on margins at one time.

A resolution was agreed to changing the day of holding the special services in memory of the late Senator Plumb, to Thursday, the 18th inst.

The senate then proceeded to executive business, and when the doors reopened an adverse report was made on the bill for a bridge between New York and New Jersey. The bill was placed on the calendar.

The report of the committee on privileges and elections in the case of the Florida senators, declaring Call entitled to a seat, was taken up.

NIAGARA FALLS.

Bad Weather Can't Hinder Fast Work on the Tunnel.—The Spring Boom.

NIAGARA FALLS, Feb. 4.—The heavy snow and cold winds have no effect upon the work that is going on so rapidly. The progress of the tunnel is very satisfactory. At the portal the tracks have been taken up to give room for the excavation of the open cut. The lower trench is being rapidly taken out to the grate. Nearly 200 feet from the water's edge has been removed. The amount of rock to be taken out between shaft 1 and shaft 2 is greater than between shaft 2 and the end, and it is probable that the work at the east heading of shaft 1 will rest after this week for a time, for then the amount of rock to be removed at the two points will be about equal. A still larger pump for running the water from the tunnel has arrived, and will be put to work next week. It will do the work of three smaller ones.

That portion of the tunnel canal being excavated by the Cataract Construction Company is progressing rapidly. A track for hauling stone for loading the cofferdam has been laid across the top. The pump for moving the water inside the dam and the boilers for furnishing power have been taken out upon the eastern embankment and a crib for the pump is being built.

Nickel or Meteorites.

NEW YORK, Feb. 4.—When the news of the discovery of a nickel mine in Oregon reached officers of the geological survey in Washington, a short time ago, they made an examination of the specimens of ore sent in by the prospector, which were in the shape of pebbles about the size of hazelnuts. The discoverer reported they were found in great quantities over a considerable extent of country. Experts examined the first samples and promptly declared them meteorites. Instead of finding a mine of nickel, they declared the prospector had simply picked up a few bits of star dust. Since then, however, it is understood a competent mining engineer has been over the field, the precise location of which is not yet disclosed. He has found it thickly strewn with such pebbles as those offered for examination, so much so as to entirely explode the theory that they are meteorites.

### TO PREVENT TRUSTS.

An Iron Clad Anti-Trust Bill Introduced in New Jersey.

FOUND ANOTHER SILVER MINE.

It was Discovered By the Aid of a Spiritualist.

A RICH STRIKE IN COLORADO.

The Ore is Worth \$10,000 per Ton—Cardinal Manning's Will—Funeral of Dr. Spurgeon.

NEW YORK, Feb. 4.—A bill was introduced in the New Jersey legislature yesterday aimed at the sugar trust. It provides that any trustee, director or officer of any corporation engaged in food manufacture, who shall purchase or sell stocks or bonds belonging to a corporation, shall be guilty of a misdemeanor, and may be punished by imprisonment for from six months to one year, or by a fine of from \$1000 to \$5000. It also provides that every shareholder shall at all times have free access to the books of the corporation, and no corporation organized under the laws of New Jersey shall invest any of its money in any similar business outside of the state, under the penalty provided above. All meetings of directors must also be held in New Jersey, and two-thirds of the members of the board must be residents of the state. No member of any stock-jobbing house shall be eligible as a director. Every \$10,000,000 concern shall have ten directors, and for every additional \$5,000,000 capital one extra director, who shall own at least 100 shares of stock and must subscribe to an oath to observe the provisions of this act. Capital stock is limited to \$50,000,000.

Valuable Mine Discovery Near San Jose.

SAN JOSE, Cal., Feb. 4.—A few months ago, when the noted spiritualist and mindreader, John Slater, was in this city, he caused considerable interest and speculation by the announcement that he had discovered a mine of valuable ore near this city. The mine is located a considerable distance up Alum Rock canyon from the springs, on what was known as the old Hobson ranch, now the property of H. H. Anderson, of this city. Mr. Anderson was interviewed by a reporter, but he was very reticent and uncommunicative in regard to the matter, although it was evident that he was aware of the importance of the discovery that had been made on his property. He would not make any revelations, however, as to whether anything was to be done toward opening and developing the mine. Among the believers in spiritualism in San Jose there are several friends of Mr. Slater, who have much confidence in this discovery, and eagerly look forward to its development. They refer to a similar discovery, through aid of spiritualism, of the great Hayes-Chenoweth iron mines in Michigan, whose operation has made Mrs. Hayes, who is now a resident of Santa Clara county, many times a millionaire. They expect similar results from what in the future will undoubtedly be known as "Slater silver mine."

Another Remarkable Strike.

DENVER, Colo., Feb. 4.—One of the most remarkable strikes of rich ore ever found has been made in the famous Mollie Gibson silver mine, near Aspen. A nine-foot body of ore has just been discovered, which is worth fully \$10,000 a ton. The drift run continued, and penetrated a seven-foot body of ore, averaging 800 ounces to the ton. The news of the wonderful strike has been kept from the public, and is made known for the first time today.

Cardinal Manning's Will.

LONDON, Feb. 4.—The will of the late Cardinal Manning was opened today. It shows he was possessed of less than £100, which was in consols and a collection of books. This fact speaks louder than words in showing the benevolence of the cardinal.

Funeral of Dr. Spurgeon.

MANTONE, Feb. 4.—Services over the remains of Rev. Mr. Spurgeon took place in the Scotch church here today, after which the body was taken to London for interment. Great crowds of people were present.

The freezing nights and thawing days are liable to cause serious injury to fall grain. The present weather is similar to that of February, 1883, when almost the entire fall and winter wheat of the Willamette valley was frozen out. The damage now would be light compared with that of 1883 as little fall wheat was sown, the fall rains preventing it.—*Eugene Guard.*
