A few days ago the Times-Mountaineer, in a moment of thoughtless candor spoke in a complimentary manner of our new commended the paragraph the paper practically ate its own words by the following compressed tissue of falsehoods:

"It must be understood that the present system of water works-new mains in the lower town—was only adopted by the water commission after a million dollars worth of property had been des-troyed by the flames by reason of the council adopting an inadequate means of fire protection last year. After what the Times-Mountaineer had told them several times might happen, did happen, they adopted a further extension of the water system to that part of the city below the bluff; but it was a case of locking the stable door after the horse was stolen.'

The Chronicle dislikes immensely to be compelled to notice the statements of a paper whose editor is wholly under the control of another whose bidding he is forced to do, even to his own financial and more with the control of another whose bidding he is forced to do, even to his own financial and more with the control of another whose bidding he is forced to do, even to his own financial goods before purchasing.

Byrne Floyd & Co., leading wholesale and retail druggists of The Dalles, have, in addition to other lines of goods, just opened a splendid stock of combs and brushes. You should inspect these goods before purchasing. and moral ruin. But this much must be repeated and the man does not live who can prove it false: The compettion of the water works was delayed as much as a year by the man whose collar the Times-Mountaineer wears. One veto after old rate. By order of the Board.

3-7-6t C. L. Phillips, Secretary. another, of ordinances passed by a unanimous council delayed the work, while the man who vetoed every measure for the furtherance of the work had the use, for all that time, of more than \$100,000 of the people's money without having to pay a cent of interest. When vetoing ordinances could no longer be resorted to, an action at law was begun against the city, and hundreds believe that the plaintiff in the suit and the man who did the vetoing were in full sympathy with each other, or rather that the former was at the bottom of the whole business. Be that as it may, the work was delayed till the fire came and destroyed a million dollars' worth of city property, and no man on the footstool of the Almighty is responsible, to half the extent, for this destruction of property as is the man who did the vetoing, unless it be the man who is servile enough to be his apologist.

Oregon will be much concerned in the information which comes from Tacoma to the effect that the wheat weevil has appeared in countless numbers in the Cascade oatmeal mill there. These destructive insects, it is claimed, have been brought to Tacoma in a consignment of wheat shipped from San Francisco. This is the first appearance of the weevil at that port. It is claimed that it could not have been imported from western Washington, on account of certain climatic conditions. These insects were first discovered about a year ago in the oatmeal mill, but the fact was kept very quiet, as grain men claim it would advance insurance on cargoes if its presence were known.

A Buffalo, N. Y., paper notes the fact that Gen. Poe of the U. S. Engineering department, opened on the 4th inst. bids for contract to supply valves and valve frames for the hew 800 foot lock in the Soo canal, which reminds us that this day dissolved by mutual consent. J. A. Orchard will continue the business, pay all debts and collect all accounts. Dated, March 11th, 1892. is concerned the Cascade locks are simply nowhere. 'What was done there can be done here, the "Majah" to the contrary notwithstanding.

All reports concerning the favorable situation of affairs at Astoria are confirmed today by private dispatch from Hon. I. W. Case. All the financial business is now fixed; all the stock subscribed; and The Dalles joins with the seaport city of Oregon in grand and hearty rejoicing. This time Astoria wins. No matter what may be said to the contrary.

Up to date the present house of representatives stands pre-eminent as the one which has cost the country the most and transacted the least amount of business in a given time. In both these particulars it has a record beyond any legislative body that ever sat in the United States.

To whom it may corcern: Notice is hereby given that the undersigned, having this day sold his interest in the partnership doing business under the firm name of E. Jacobsen & Co., will not be responsible for any indebtedness in the name of said firm from and after this date.

Dalles City Oregon Merch 19th 1909 possession of a saloon license and a permit to carry a gun."

The tongue of the hive bee is a mos elaborate structure, admirably fitted for helping to pump up nectar. The wax producing organs of the bee are certain glands on the underside of the abdomen. which are surmounted by thin plates, on which the wax is deposited in fishes. like ministure fish scales. It is taken from these plates by a pair of shears or cutters; admirably adapted for the pur-pose and formed between two joints of the hind legs.

It is passed to the mouth, where it is chewed and rendered plastic by the jaws. The hind legs have many beautiful structures and modifications fitted for gathering pollen and cleansing the bee, while on the front legs there is a regular comb and brush, admirably adapted for cleaning the attennæ or feelers, which are very delicate and im portant sense organs.-Boston Tran

During my second year at the Jeffer son, Medical college, in Philadelphia, I had for a classmate a regular lunkhead One of the professors was in the habit of taking the boys unawares and quizzing them. He said to this chap one day "How much is a dose of —? giving the technical name of croton oil teaspoonful," was the reply --

professor made no comment, and the fellow soon realized that he had in a complimentary manner of our new made a mistake. After a quarter of an water system. When the Chronicle hour be said. Professor, I want to change my answer to that question "It's too late, Mr. -. " responded the professor, looking at his watch, "your patient's been dead fourteen minutes." -Cor. New York World.

> An extraordinary development is tak ing place in the coal fields of West York shire. England, and it is expected that the mines of that region will reach an annual capacity of 30,000,000 tons within the next three years. - New York Jour
