Reno Gazette. G. W. Mabes recently sold 500 head of fat steers to Henry Moffit of San Francisco for \$50 per head. shipped and the rest will follow in a few

Why do not the people who have so much sympathy raise a subscription of \$110 for the poor widow, in Astoria, who is not permitted to put up a government responsible to them in case of fire? It is about that period, in the lives of some personal hatreds for public good.

Cap. Endersby informed a Chronicle careful examination yesterday of his he goes west he usually bags big game. are so thick on the trees that they could ditches and irrigating canals he had betstand considerable thinning out and yet ter luck. Jason loses no sleep over the leave as much fruit as the trees ought to extinction of the American bison, but if be allowed to bear.

One our handsomest and most popular young society men met with a sin- dreary for him. gular surprise yesterday morning. Night before he returned from a whist party a couple of hours after midnight and with as little delay as possible went tinued this morning. There is nearly to bed leaving one of his bedroom windows open. As he opened his eyes in Later, the sun came out and the snow the morning and looked towards the began to melt rapidly. foot of the bed, they fell on a matron of the feline race which, during the preceding night, had been taken with the troubles incident to the propagation of her species, and, seeing an open window and a comfortable bed had sought its kindly softness for bringing her five lit-tle sightless children into the world.

THE CHRONICLE erred yesterday when it said that it was the children of Rev. A. C. Spencer who arrived here last Sunday morning from the east, who are down with the diphtheria. The fact is, the two who are ill, one a girl of fifteen and the other a boy of thirteen, lived here all winter, and Lily Richards has been living with them for about six weeks. None of the children who arrived Sunday morning have as yet shown any symptoms of the disease. THE CHRONICLE makes this explanation in justice to Mr. Spencer, who very naturally would not like to have it supposed that his children brought the disease Julius Wiley, steward of the Regu-

lator, has spent most of his spare time since last Sunday studying the church since last Sunday studying the church and very heavy, but during the follow-calendar in order to find the orthodox ing fifty years the weight of construcdeck hands who asked, "Aint you going pommeled saddle evolved into the long, to set the eggs up for breakfast this light hunting saddle actually in use at morning, Julius?" steward. "Why! why it's Esther Sunday, don't you know?" "No, I didn't know it was Easter Sunday." was the deck hands and Julius responded by ordering the cook to give the boys all the eggs they wanted to eat. After they had loaded themselves down to the gunwale, Julius began to suspect that he had been made the victim of misplaced confidence, but the boys assured him that, as this is leap year, there are two John Donahue, the future justice of Easters in it. So Julius is now studythe peace of Kent' precinct, in Sherman ing the calendar to find out if the boys have lied to him, and at last accounts. he gravely suspects they have.

### DEMOCRATS IN COUNCIL.

The following gentlemen were chosen as delegates to the state convention: E. W. Rinehart, A. S. Bennett, J. L.

A motion to instruct the delegates to support A. S. Macallister for joint senator was voted down.

Boone, Ia., April 14:-The storm raged all night with unabated fury and coneighteen inches of snow on a level.

### THE MODERN SIDESADDLE.

Why It Is That a Woman Is Safer on Horseback Than a Man Is. About the year 1830, by an accidental circumstance, women's riding was revo-lutionized. An Englishman made a wager to ride a steeplechase on a side saddle. A preliminary trial showed him, I imagine, the rashness of the attempt. So to minimize the danger by enabling him to sit safely, Mr. Fitzhardinge Oldacre, I think, invented the third pommel. Looking back one wonders how it was that women had not long before invented it for themselves under stress of urgent need. But one generation followed another and no one seems to have thought of it. Once invented, however, it was immediately adopted, and a three pommeled side saddle came into general use. This in-vention at once reinstated women's riding as a fine art by producing a new de-parture under improved conditions. For the grip obtainable by its means gives the greatest possible security in exchange for the least possible expenditure of force

Saddles of this kind were cumbrous day on which Easter falls this year. tion was gradually reduced, and little Last Sunday morning he was ap- by little every unnecessary item was proached, before breakfast, by the four cut away, till in course of time the three "Why?" asked the present. It differs in several ways from its prototype. In this modern saddle the long narrow cantle is built over a sort of tunnel, which takes in the horse's withers and allows the seat of the saddle response. "You bet it is," chorused the to lie flat; while the old fashioned seat sloped up and tilted the rider's knee with much the same effect as riding up

All traces of the outer pommel have disappeared, leaving a free space where no resistance is necessary. Finally, the left hand pommel is placed high up the thigh, where the grip is strongest, the pressure having formerly been placed just above the knee, so that a shorter stirup was necessary. Now, such greater leverage led to an exaggeration of movement, which prevented all rhythm. for obviously the closer the rider can sit the more possibility there will be of being "one" with the horse, of riding so as to blend with his action, of, so to speak, following the pattern of his

In the modern saddle all modifications tend to diminish effort and by greater security to enable the rider to sit very still. Strength of seat seems to me to be the result, roughly speaking, of three grips, caused by the opposing pressure of the two legs against the pommels. Of these grips, the first results from the downward pressure of the whole length of the right thigh and the upward pressure. or the right thigh and the upward press-ure of the left. The second is the grip, just above the knee, of the right thigh against the pommet, involving the press-ure of the leg just above the ankle on the saddle flap below. This grip is counterbalanced by the left leg's inward pressure at the knee. And, third, the hook back of the right leg over the pom-met as opposed to the pressure of the mel as opposed to the pressure of the stirrup foot.

Moreover, by sitting far back the leverage of these three grips is in-creased, and the consequent distribution of the weight makes the balance right. The legs must be immovable on the saddle, but above the waist the body sways and gives to the horse's action, and from constant habit a good rider adjusts the balance almost by instinct, and carries on the horse's movements in a multiplicity of tiny curves which pass imperceptibly from one step to another without any jerk or abruptness of move-ment.—English Illustrated Magazine.

Byrne, Floyd & Co., the leading whole-sale and retail druggists of The Dalles, have today received their second large invoice of Best Tonic. Best Tonic takes with all who have tried it. It cures dyspepsia, strengthens the system, restores sound and refreshing sleep, and have because at meal time promotes stores sound and remail time promotes as a beverage at mesi time promotes 2-27-dtf.

### A CLOUD BURST.

"Say, John, where did you get those ell fitting stylish shoes from? "Why, I purchased them of The Dalles Mercantile Company."

"You don't say so?"

did you say they were?"
"Why Walter H. Tenney & Co., of

"Well, now; I thought so. I am right glad I met you, for I shall buy a pair for myself, and take my family along too, for my children have always worn them. And do you know? they last a whole year."

"Yes, and you can get them in all widths, and prices, in men's, ladies, misses, child's, infants, boys and youths. And do you know, they are sold under

"No. Why do they do so?" "Because they have a world wide

reputation. and can be relied upon." The Walter H. Tenney Shoe is sold only by The Dalles Mercantile Company, who are sole agents for The Dalles.

This lime is manufactured by The Oregon Marble and Lime Company, near Huntington, Oregon, and has earned the reputation of being the strongest lime in the market, and consequently, in addition to making the best work is at an equal price, the cheapest to the user. The following analysis by W. G. Jenne, chemist, Portland, Oregon, is worthy of consideration:

Carbonate of Lime 98.56 Magnesia .015 Silica. 1.31 Water .095 Peroxide of Iron .07 Phosphates Trace Alumina .03 Sulphates Trace 99.99 MR. T. F. OSBORN, Dealer in Building
