## BORUP IS RECALLED.

Accused of Trafficking in Plans of French Defenses.

HARRISON THANKED FOR ACTION.

Secretary Elkins Believes Borup is Wrongfully Accused.

A LIMITED OFFICE ALLOWANCE.

That he Should Buy or Sell Illegally Obtained Plans is Absurd on its Face.

New York, June 29.—The tempest in a teapot all over France, Italy and Germany, growing out of the charges preferred against Capt. Borup, of St. Paul, Minn., the military attache of the legation at Paris, that he had been instrumental in transferring plans of French defenses to Germany and Italy, has blown over, and President Harrison has been thanked by the French government for recalling Borup. Hon. T. J. Coolidge, American minister to France, had an interview yesterday with Ribot, minister of foreign affairs, and informed him that in accordance with the request of the French government the United States had recalled Borup. This had a good effect, and the scandal will probably stop now. The French are fussy in most matters of an official kind, and it is not believed by reasonable people any where in military circles that Borup had anything to do with Genier. Borup is on friendly terms with the other military attaches, including those of Germany and Italy, and this fact has served to strengthen the feeling against him, as the French do not like anyone to associate on other terms than bare official intercourse with the Germans. Besides plans of the defense of Toulon, Brest, Cherbourg and other places, Genier is charged with divulging, through Borup, a code of marine signals prepared for use in the event of war with Italy. The authorities have released M. Oudin, who was arrested on a charge of complicity with Genier. Secretary Elkins, speaks in the highest terms of Borup and expresses confidence in his ability to prove his innocence. His recall, was the natural consequence of the unfortunate affair, for, even though he may satisfy the French authorities that he has been wrongfully accused, his usefulness as an attache will necessarily be impaired. His recall would therefore have followed, regardless of any demand for it by the French authorities. The fact that Borup is allowed only \$50 a month for office expenses, out of which he is authorized to purchase periodicals, maps, drawings, etc., must be accepted as pretty conclusive evidence that he has not gone into the business of purchasing stolen plans on a very large scale. That he should sell stolen plans to other countries would seem to be equally absurd when it is known that he is financially rich.

### Oregon Weather Report.

PORTLAND, June 28.—Eastern Oregon. Showers fell on the 22d and frosts of varying intensities occurred on the mornings of the 21st and 22d in counties east and south of the Blue mountains, which injured vines and tender vegetation to some extent. Since the 24th the temperature has been rising, until Sunday and Monday, when it was upwards of 95° in almost every section. The winds have been from the north and the air is very dry. Crop conditions have not improved any. There yet is and most likely there will continue to be a gloomy outlook for the grain crop. In the central part of Gilliam county, the eastern portion of Umatilla county, generally through Union and Wallowa counties, the grain crop is good, but in the other portions of this section the grain is burnt, farmers are discouraged and some will not obtain even their seed. The weather has been cool for corn, but the late warm weather may give it more growth. Twenty four hours of good rain fall would revive much of the damaged wheat. Barley and rye are doing better. Rye will soon be ready to cut. Strawberries are ripening in Grant and other interior counties, where also alfalfa is being cut. The rivers have been falling for the past three days, and all danger of high water is now passed. Western Oregon. Tuesday the 21st, was cool and showery, and from Wednesday the temperature has risen until Sunday and Monday the 26th and 27th when 90° or more were recorded through-

out this section, except on the immediate coast. This is the warmest weather so far this year. The sky has been cloudless and the winds have been northerly. Grain has grown and filled very well, except in parts of Josephine and Jackson counties, where it has been burned. Along the coast and in Douglas county, and throughout the Willamette valley, the grain is doing very well, though it is not so good as last year. The ground is becoming very dry and hard, and all vegetation would be benefitted by rains. Potatoes are doing very well and promise a good yield. Rasp and black berries are now ripe. Strawberries are not so plentiful now as one week ago, and they are going out of season. Cherries are ripe; they are of good quality, but not an average in quantity. Hop lice are present, but are yet rather dormant; it is hoped that the present warm weather may decrease them. Haying is being finished, the weather being very favorable to that operation. The fruit prospects are no better as for quantity, but the quality promises to be above the average.

### Current Topics.

The East Oregonian has ascertained that A. E. Stevenson, vice-president on the democratic ticket, is a cousin of ex-Governor Stevenson, of Idaho.

Harrison R. Kincaid, editor of the State Journal, has been recommended by a number of the prominent citizens of Oregon, for the position of Collector of Customs at Portland, made vacant by the death of Hon. R. P. Earhart. The Guard hopes that he will be given the appointment, as he is deserving of the place by his long and continuous faithful services to his party. Besides, says the Guard, he is honest and fully competent.

The people of Lane county are jubilant over the fact that the subsidy for the railroad from Eugene to Florence has all been raised, says the Times. This was at first thought to be impossible, but every man put his shoulder to the wheel, fully realizing that in unity there is strength, and the \$100,000 was raised. The people of that county never made a better investment. The natural advantages of the route, the subsidy that is pledged, and the resources of the section of country to be traversed will make it a profitable and paying road.

An exchange would have the public believe that matrimony being one of the United States, Ohio likewise, and ex-secretary Whitney having married in Ohio; he is, therefore, "an Ohioan by marriage." Oil's well that ends well.

Referring to the bolt of the Oregon delegation for McKinley, Hon. C. W. Fulton says it meant no ill will toward Harrison. "When the Oregon delegation reached Minneapolis we found a big split in the republican forces, and, despairing of Harrison's ability to unite them, and believing also that some 'dark-horse' democrat would be chosen instead of Cleveland at Chicago, we came to the conclusion that safety lay only in nominating some new man. Therefore we voted for McKinley. Mr. Hayes, however, voted for Harrison. We feared the democratic dark-horse because the attitude of both Harrison and Cleveland on the silver question is well known, and silver men believe that either would veto a silver bill. Therefore, surmising that the democrats would possibly put up a man who had not committed himself, or who would probably approve a free-silver bill, we thought it suicidal for us to put Mr. Harrison in the field. The silver men favored McKinley, not because he had shown a favoritism for free silver, but because he had remained upon the fence without declaring himself. They thought they stood a better chance with him than with Harrison. Its all right now."

### The Tygh Hill Road.

Dufur Dispatch. Tom Driver in town yesterday, says the Tygh road is nearly done, and is now in use. All speak in high terms of the road, and particularly of the easy grade that has been secured. One man with two horses took up a load of 1,000 pounds in fifty minutes. A part of our coming celebration will be to celebrate the completion of the Tygh hill road. Glory enough for the day.

## PARLIAMENT CLOSED.

Decree of Dissolution Signed by Victoria Yesterday.

WRITS ISSUED FOR NEW ELECTION.

Commended For Its Six Years of Arduous Labors by The Queen.

CULTIVATING OWNERS INCREASE.

Educational Measures Applied to Ireland Believed to be of Great Good.

LONDON, June 29.—The queen yesterday signed the decree at Windsor castle, dissolving parliament. There were present Lord Cranbrook, lord president; ex-Chancellor Goschen, chancellor of the exchequer, and Earl of Lathom, lord chamberlain of the household. Writs for the election of members of the house of commons were at once distributed. The queen's speech proroguing parliament says: "The time has arrived when it is expedient the electoral body of the country be consulted by the assembling of a new parliament. I have therefore summoned you for prorogation at an earlier period than usual. I am glad to record that my friendly relations with foreign powers remain unaltered. Treaties have been duly ratified referring the differences with the United States with respect to the Behring sea to arbitration." Referring to the bills passed at the session just ended, the speech says the arrangements that parliament has made enabling the workmen to purchase agricultural holdings will increase a class of cultivating owners, which is of great importance to the state. The application to Ireland of the educational measures recently adopted in Great Britain will confer a very great benefit upon the people of that country. The speech concludes: "In closing this parliament, which has been usually laborious and also highly fruitful in beneficial legislation, I thank you for the assiduous performance of your momentous duties during the past six years, and heartily commend you to the favor of Almighty God."

### Oregon Granite.

Reporter. If anybody doubts that granite of excellent quality, and quantity sufficient to meet all demands abounds in Yamhill county, he can have his doubts removed by calling at this office and inspecting a sample of the rock, or by driving to the ledge three miles distant. Portland builders and capitalists should investigate this. It is easy to get at good wagon roads and no steep hills to climb, and a motor line or railroad spur could be built to it without great expense.

### Reservation Gold Fields.

Klamath Star. A report is in circulation to the effect that in many places on the Klamath Indian reservation good prospects of gold, both quartz and placer, have been found quite easily, some of them extremely rich. The government forbids the working of mines there, but when the reservation is opened to settlement, the rush for these prospect holes will be lively and probably pretty warm.

### Telegraphic Flashes.

Canada is finding a large number of duplicate return certificates issued to Chinese, and on motion of Sir John Thompson, Gordon's bill to amend the Chinese immigration act was transferred to government orders.

The cholera is spreading rapidly in some parts of the Russian empire. At Baku, the inhabitants are fleeing in panic. The military physician at Dushak telegraphs that the disease is beyond control and asks for assistance.
