A New Lifeboat.

A new kind of lifeboat has been constructed to the order of the Boulogne Humane society on a model designed by one of its members. The construction of the new boat is simple and economical, and could be adapted to any sea-going rowing boat.

These compartments are protected from injury by a casing forming double bulkheads, inasmuch as the shape of the hull preserves perfectly its boatlike appearance. It means really a little more beam and consequently more stability. The proposed new feature does not at all affect the speed of the vessel.

The outward application of these air cases gives greater solidity to the boat's side in the event of being staved in, and will tend to prevent accidents such as happen through people bringing their weight to bear on one side of a boat when pulling a person out of the water.

All this weight failed to overturn the boat, the water tight compartments brought into contact with the water resulting only in giving the boat a partial list and so far proving its resisting power and buoyancy.

The pickle industry near Pittsburg has assumed enormous proportions. The latest shipment in this line ever made recently left Pittsburg for a Kansas City firm.
