GIVE BLOW FOR BLOW.

The Dominion Government Hostile Over
Canal Matters.

THE SOO AND THE WELLAND.

Seeking Opportunity For the Evasions
of the Treaty of Washington.

FEES AND FEATHERS EDITORIALS.

Sam May Possibly Yet Have to Administer a Salutary Lesson to
Canadians.

DETROIT, July 25.—The liberal-conservative Toronto News commenting on the proposed retaliation measures of the United States government against Canada in the matter of canals, in an editorial headed "Give Blow for Blow," says: "It should be the policy of the Dominion government to cultivate the most friendly relations with the United States, but it is good to understand that this is not to be brought about by lying down and allowing the Americans to walk over us. It is the duty of our government to return blow for blow. Americans employed in this country should be dealt with as Canadian laborers are dealt with across the line. If the Americans want fight, and nothing else will do, we will give them enough of it." The Montreal Star prints an editorial couched in similar language. It is reported on good authority that the Dominion government, in the event of President Harrison's enforcing the act imposing a tax on Canadian vessels passing through the Soo canal, will pass an order in council imposing an equal tax on American vessels passing through the Welland canal. This, it is claimed, will not be any more an evasion of the treaty of Washington than the threatened American decrees, as the United States government by the same treaty agreed to secure for Canadians on the same terms as Americans the use of the Soo canal, at that time owned by the state of Michigan.

The Fight is Over.

SPOKANE, July 25.—After a long and bitter fight the mines in the Cour d'Alenes are now working without danger of interruption. The Gem, Sierra Nevada, Bunker Hill, Custer, Sullivan, Union and Morning properties are now running with non-union men. Men are pouring in by the hundred since the downfall of the union. There are more men in the country now than there is immediate work for. Every mine-owner in the country is crowded with applications for positions and is turning away dozens daily. Ore is being shipped. There is a more hopeful feeling prevailing than for the past seven months. Business in general is better. The military authorities are gradually relaxing the rigid martial law that has existed for the past ten days. Nearly all the strikers have been captured. Those in the hills will probably remain there until they make their peace with the authorities or the mine owners. Still the agents of the union are making their presence felt.

Just so Here.

GOLDENDALE SENTINEL. The republicans of this county are in favor of each county being allowed to make road laws and stock laws independent of the entire state. If such laws are passed by the next legislature the people of the entire state will be greatly benefited by it. It will never do to try to form a general road law that will give general satisfaction over the whole state. But a few days ago a gentleman riding over our county said he did not think that there were such excellent roads in the state as are here, and in reality there are few better roads than we have in Klickitat. What we want now is carefully built and kept bridges and a care given to keep the roads free from stones.

Baker County Mines.

Democrat. It is indeed gratifying to note the increasing activity manifest in mining affairs in this section. Hardly a day passes but that mining men arrive from either the east or west to inspect our mines or to commence work on their own properties. Never in the history of the country have our mines commanded the attention and presented the lively scene of activity visible on all sides as today. They have a magnificent future and time is all that is required for them to develop into one of the greatest bullion producing camps ever discovered.

The Columbia Commerce.

ASTORIA EXAMINER. The Port of Portland will soon have a pow-wow over the rise in pilotage and towage rates. The great question to be settled is, "How does the change affect Portland, and have we got the best of it?" Other parts of the state have no interest worth considering. If Portland concludes she is getting the worst of it, she will go into the next legislature with a bill to fix things her way. But every year the commerce of the Columbia is getting bigger and bigger, and Portland's power to handle it is getting weaker and weaker. By and by there will be a bust, and the shipping, like water finding its level, will seek its seaport at the mouth of this river.

She Did Not "Look Pleasant."

DENVER NEWS. A Presbyterian divine recently visited this city only to have a somewhat startling experience. While near the union depot he thought it would be a fine thing to shoot his kodak at a Ute squaw, but when the squaw saw the kodak pointed toward her she thought she was being bewitched and, pulling a large knife from under her apron, she made a desperate lunge for the divine. He saw what was coming and dropped the kodak in his fright and made a very undignified dive for the other side of the street. The squaw captured the witch instrument, and, after demolishing it, replaced her knife with a satisfactory grunt and marched triumphantly away.

The Dalles Wool Trade.

VALLEY TRANSCRIPT. A Transcript scribe was pleased to have quite an extended chat with ex-Governor Moody, of The Dalles, while that gentleman was in town Sunday. Mr. Moody runs a large warehouse at the neat little city at the gate to the Inland Empire, and probably handles more wool directly from the producer than any other house in the United States. He will receive and ship this year upwards of 5,000,000 pounds of wool, which is a pretty good stack of that article, when you think of it. This was the ex-governor's first visit to Dallas for a number of years, and he expressed himself agreeably surprised at our advancement.

Bridge Accident.

NORTH YAMHILL, July 25.—Three men in the bridge accident on the Trask, fifteen miles this side of Tillamook, are pretty seriously injured. The whole outfit, stage, horses, driver and two passengers, fell with the bridge 30 feet on to the rocks in the raging torrent. It was a miracle they were not all killed. C. B. Hadley of Tillamook and Rev. Edmunds of Iowa were the passengers and Wilbur Maddock of North Yamhill the driver.

New Kind of Barley.

GOLDENDALE COURIER. A remarkable sample of barley was brought to this office this week, by Mr. M. Lusby, whose ranch is situated three and one-half miles north east of town, on Rimrock. This barley was in some grass seed that Mr. Lusby got, and it being different from anything he ever saw, he awaited its development. The heads are composed of six distinct rows of grain, each row containing from 13 to 16 grains of plump grain. Farmers, call and see it, and tell us what kind of barley it is.

Studs at Castle Craig.

DUNSMUIR NEWS. The young lady guests at Castle Craig tavern have made a bathing resort out of a deep pool in Sacramento river. They jump from the bridge into the pool, and kick up all sorts of capers in the cold water. Some of them wear bathing suits that don't contain material enough to make a flying jib for a wheelbarrow, or a hood for the American Eagle, but old Mt. Shasta and Castle Craig look on without a blush.

The Baby Racket.

PHILADELPHIA RECORD. The Baby Ruth and Baby McKee politicians have met with another discouragement. Mr. Cleveland has been constrained to inform them that he has no photograph of his little baby, and that he would not send it for publication if he had. The persons who are engaged in the baby style of politics may mean well enough, but they are growing very tiresome.

TRIED TO KILL FRICK.

Alex Berkman a Russian Jew in Custody For The Act.

DELIBERATE ATTEMPT TO MURDER.

The Assassin is a Radical Calamity
Howling Anarchist.

EFFECT OF HIS KILLING ASSAULT.

It is Said the Assassin Has Injured the Cause of The Union by His Desperate Work.

PITTSBURG, July 25.—The bloody work of the assassin Berkman seems to have so greatly injured the cause of the union strikers that it has become necessary for them to deny everything, even to his affiliation with any labor union organization. Berkman is a Russian Jew who came here from New York with the evident intention of killing Frick. Although very badly injured, it is believed Mr. Frick will recover. The assassin is in safe keeping, and will be dealt with according to law. It seems pitiful that such an ignorant and contemptible cur should live in free America to carry the life of such a man as H. C. Frick in his hand. When he entered the building in which was Frick's office, and pounced directly upon his victim he was armed with a dagger as well as revolver. Three shots were fired at Frick, two of them taking effect, before the occupants could have time to realize what was going on, then, in attempts to disarm him he used his dagger. This deliberate attempt at assassination is the direct result of laxity in admission of the anarchist element into the United States. Two cartridges of dynamite were in his possession also when he was captured. He is an anarchist of the most radical style. About six years ago Berkman, who is a Russian Jew, came to New York from Wilna, Russia. He made himself conspicuous by his marked radical views against capitalists, and it is said, he attempted to organize a group for the purpose of going about the country exterminating capitalists. In 1891 he secured a position in the composing-room of the Treibeir, Most's paper, where he worked a short time. He had been an idler about the anarchists' haunts in New York for some time. The police are of the opinion he was simply a tool of the anarchists, and was sent to Pittsburg for the express purpose of killing Frick. Detectives are working on the matter at this end.

These Be Facts.

ASTORIAN. The reports from the Inland Empire indicate that the crops this year will be as abundant as they were last season. The acreage will no doubt be larger, for last year's high prices have stimulated ranchmen to put more land under wheat than heretofore. The surplus of this grain crop should come direct to Astoria for shipment. In no other way can the wheat grower be saved the cost of successive handlings. It is by direct shipments to New York that Buffalo, which is 400 miles from that city, is able to send wheat so cheaply to foreign markets, the cost not exceeding three cents a bushel from Lake Erie to the port of New York.

A Contractor Skipped.

ASTORIA HERALD. Frank Malone, a big contractor, who has been doing work on Genevieve and Court streets, under a sub-contract from Carnahan & Morrison and H. B. Parker, has gone back to Portland and forgot to pay off a number of men employed. There are eight men and each one has from \$30 to \$75 coming to them. They have gone in debt for their board and being beat out of their money leaves them flat broke. There ought to be some way for them to get their money. Astoria has been frequently beaten by Portland contractors, and it should be stopped.
