CANADIAN AFFAIRS.

Action of the Cabinet on the Retaliation Proclamation.

NO ATTEMPT TO BE MADE TO MEET IT

The Ideal Absurdity of Continuing the Washington Treaty.

SHORN OF ALL SPECIAL BENEFIT.

The Proprietary and Territorial Rights of Canada in the St. Clair Falls Canal.—Other News.

WASHINGTON, Aug. 25.—Reports of a meeting of the Ottawa cabinet yesterday to discuss the outlook and the probable effect of President Harrison's proclamation on Canadian lake shipping, made public through the Post, show that it has been decided that the Canadian government will reimburse the Canadian shippers this season for any loss they may sustain through the imposition of tolls on freight going to Canadian points through St. Mary's canal. It is said that no attempt at retaliation would be made in the direction of imposing discriminating tolls on American vessels passing through the Welland canal, as had been suggested by some government journals. It was further decided to carry to the notice of the British government the absurdity of continuing the Washington treaty in force, in view of the fact that it has been denuded of every clause by which any special privileges were conceded to Canadian citizens, and to urge the abrogation of the treaty at the earliest possible moment. The question of asserting the proprietary and territorial rights of Canada in the St. Clair falls canal where it passes through Canadian territory was discussed, the attention of the government having been drawn to the fact that time would weaken their right to assert jurisdiction in those waters. It was contended that the fact that the Canadians accepted the use of the St. Clair falls canal on terms of equality with citizens of the United States did not concede to the United States any exclusive proprietary rights in the waterway.

THE MARKETS.

Reports From Various Centers in the East and West.

Special to THE CHRONICLE.]

August 25.—The New York stock market continued the upward movement. The Texas railroad decision influenced prices and was potent in the advances effected. Gould stocks were a strong feature. The grangers were prominent for strength, the whole list sharing the upward movement. The general market was firm, the close being rather active and heavy to weak.

In Chicago wheat was fairly active; opened 1/8c lower on Buffalo strike, weaker cables, increase on passage, increase in English visible, increase in British stocks of wheat and flour; declined 1/8c more; advance 1/8c on lighter receipts in the northwest; firmer on late cables and good buying by New York and St. Louis; declined 1/8c on realizations and closed steady 1/8c lower.

"How are potatoes?" was the question put to a leading rancher of Wasco at the Umatilla house this morning. The season has been almost an ideal one for potatoes. A little more late rain would have increased the yield, but at the expense of the quality. Probably less ground was seeded to these tubers than last year, but the yield will fall but little below that of last fall. Considerable inquiry has been made for potatoes to ship east, but as yet no prices have been quoted, as but few of them are ripe enough to ship so far. Should any great amount be shipped to eastern markets the consumers at home will probably pay a good round price for them before another crop is grown.

For fruit the season has been a good one, very few orchards being injured in the least. Berries are practically gone, but apples and plums are ripening quite freely now, and the abundant season, coupled with the new orchards commencing to bear, will greatly increase the total crop.

Unlimited Possibilities.

Press-Times. Mr. Harrison thinks he can be elected without New York. Mr. Cleveland thinks he can be elected without New York. Mr. Weaver seems to think he can be elected without any of the 44 states.

Two Dollar Diggins.

Wenatchee Graphic. The Columbia is gold bearing at any point, but none but the Chinese seem to make it pay. A Chinaman who has washed the bars of the river for twelve years tells us that any of them bear gold; that under favorable conditions his countrymen can make from \$1.75 to \$2 per day; that the reason the white man can not succeed is because they do not use care enough in saving the gold, which is exceedingly fine. The Chinamen use a great deal of quicksilver and run water through the sluices very slowly; the American is in too big a hurry, and floats away the gold. It is quite hard work, as the dirt must be lifted very high.

Female Hunters.

Idaho Free Press. At a hunting party in the Elk city district the ladies were turned over to the lady residents of the camp and during their stay they enjoyed a royal good time fishing and hunting. One day they caught sixty-seven handsome trout. The next night they ambushed, at an elk lick on the Red river meadows, and succeeded in bagging a cow elk with her calf. The next day two does and a buck fell before their skill with the rifle, and it seemed as if all the game in the valley knew of their advent and were eager to stand up and be shot at by their fair visitors.

Lower California Storm.

SAN FRANCISCO, Aug. 25.—A terrific rain storm occurred at Santa Rosalie, lower California, the seat of the great French copper mines of Bolero, on the 22d, destroying \$100,000 worth of property. A torrent of water over half a yard deep poured down the rocky hills, carrying away part of the custom house and smelter, and rushing into the mines doing considerable damage to the railroad, stores and houses. It will take a month to make repairs. Had the storm occurred during the night probably many lives would have been lost.

Humid Idaho.

Lowiston Idler. A study of the meteorological data of Idaho leads to the conclusion that the humidity of the atmosphere is increasing year by year. Never since the settlement of Idaho has there been such an immense crop all over the state as during the present season. The product of grass and grain has been wonderful. Scientific estimates attribute this result to a change in climate produced by the multiplication of irrigating canals, which moisten a great extent of country and create a humid atmosphere.

A City Sinking.

JACKSON, Mich., August 25.—Woodville, three miles west of this city, is in danger of sinking bodily into the earth and the inhabitants are greatly alarmed. About ten days ago the Standard coal mine became flooded and had to be abandoned, and since then several caves have occurred over the deserted mine.

High Lands for Fruit.

Review. High up on the mountains surrounding Wenatchee as fine fruit has been raised this season as can be produced on the lower lands of that famous valley. It is said that at these farms the temperature is warmer in winter and cooler in summer than in the valley below.

Whew! What Wheat.

Review. From a single grain of wheat planted in the White river country this spring, grew twenty-seven stalks, which attained a height of six feet, each stalk containing an average of about 150 kernels. The yield of this field is estimated at about 250 bushels per acre.

Lost in the Shuffle.

Garfield Enterprise. Allan Weir shuffled considerably between a nomination for congress and a renomination for secretary of state. He was lost in the shuffle.

Mouth-organs are now legally classed as musical instruments by Canada. Into what musical class would Canada put the tuneful stump speaker?

The campaign of education seems to have been normally successful so far. Even Mr. Cleveland has learned that his party claims the unconstitutionality of the tariff is both imbecile and ruinous.

IRISH HOME RULE.

The View of it as Taken by Senator George F. Hoar Abroad.

WHAT GLADSTONE MUST BATTLE.

The Hostility of the House of Lords, the Press, the Queen, to Oppose.

SERIOUSNESS OF HIS POSITION.

America Should Raise Her Voice in the Cause of Home Rule and Counsel Content.

WASHINGTON, Aug. 20.—A private letter from Senator George F. Hoar to a Worcester divine, dealing with home rule as he sees it, traveling abroad, reads as follows: "I think the American friends of home rule for Ireland are in a condition to exercise great influence upon the future progress of that cause and to avoid what seems to me a very great danger. Gladstone with his majority of forty-two has to encounter a hostile house of lords, a hostile press, and hostile sentiments of the upper classes and universities, and it is rumored a hostile queen. If Gladstone were to be disabled or die, it is hard to see where the leader could be found under whom the somewhat disconcerted elements could be united in any steady policy. If the Irish friends of home rule make unreasonable demands, or even if they go to the full extent of what are clearly reasonable and just demands, and Gladstone should in any way lose his majority or fail to accomplish anything, the success of home rule must be postponed to a very distant day, indeed. It seems to me, therefore, that America ought to raise her voice, which has been so influential in the cause of home rule, and counsel the Irish representatives to be content for the time being, with taking one firm forward step, even if they shall not, for the time being, gain anything which they desire. Such a step once taken will never be retracted."

The Chicago and Northern.

CHICAGO, Aug. 25.—Within two weeks the resignation of every Wisconsin Central and Chicago and Northern Pacific official will be asked, for the sake of economy, so as to throw the jurisdiction of all Northern Pacific officials over those removed. The titles of the Wisconsin Central and Chicago and Northern Pacific were then to be merged into that of the Chicago and Northern Pacific, with almost a certainty that this title will be extended to cover the Northern Pacific property.

The Fragrant Lillium.

Telegram. This office has been made fragrant all day with the odor of the wonderful Lillium Auratum, grown at Astoria, and which was described in these columns in yesterday's issue. Such a floral specimen is rarely seen, and is a valuable tribute to Oregon's soil and climate. Truly, nowhere else within the boundary of the United States can such a lily be grown out of doors. It must have been such a flower upon which the eyes of the Christ rested when he said: "Solomon in all his glory was not arrayed as one of these." It would be a hard and ungrateful heart, indeed, which would not be touched with a sense of the goodness of God by sight of this sweet plant.

Dakota Milling Trust.

Telegram. How will the farmers' alliance view the great milling trust that has been formed in North Dakota with a capital of \$1,000,000? Somehow trusts and big syndicates don't sound well in the Dakotas. There is lack of harmony in the idea with the spirit of the people. Mr. Kyle must now express himself so that there may be official declaration of approval or disapproval.
